Metro

The metropolitan metro network — the lines a rider treats as one railway, under one numbering scheme and one fare system.

Stations

192 pages

Every station on this network, grouped by line — generated from the same registry that draws the maps.

Lines

Route overviews, station lists, operating hours and service patterns.

Wenhu Line

BR 文湖線

Taipei's driverless brown line — no cab, a front window you can stand at, and a rubber-tyred guideway that climbs hills the rest of the network cannot.

Sanying Line

LB 三鶯線

New Taipei's first self-built medium-capacity metro — a driverless elevated railway linking Dingpu, Sanxia and Yingge, opened on 30 June 2026.

Tamsui–Xinyi Line

R 淡水信義線

The red line — the network's north–south spine, from the riverside at Tamsui through the core to Xiangshan, and the oldest right-of-way on the system.

Songshan–Xindian Line

The green line — three separate DORTS construction projects run as one, underground end to end, with the network's oddest branch climbing into the middle of a depot.

Zhonghe–Xinlu Line

O 中和新蘆線

The orange line — a Y-shaped route built as three separate projects, whose two northern arms to Luzhou and Huilong share one southern trunk through Zhonghe.

Bannan Line

BL 板南線

The blue line — the east–west trunk through the main station, built in eight openings over sixteen years, and the one line whose ridership its own operator does not publish separately.

Circular Line

Y 環狀線

New Taipei's orbital, and the line an earthquake took apart — eleven displaced girders, a 92 cm shove, eight months shut, and a Control Yuan report that traced it to a plate milled 36 mm too deep.

Danhai LRT

V 淡海輕軌

New Taipei's first light rail — street-running trams serving the Tamsui new town, built on Taiwan's own domestic light rail vehicle, with a second phase under construction.

Ankeng LRT

K 安坑輕軌

The second New Taipei light rail line — a valley feeder into the Xindian corridor, with a button you have to press to get the doors to open.

Taoyuan Airport MRT

A 桃園機場捷運線

The purple express-and-commuter line from Taipei Main Station to the airport and on into Taoyuan — a different operator, a different fare system, and the network's only express/local pattern.

Rolling Stock

Train fleets — builders, technical specifications, formations and where each type runs.

Taipei-region metro fleet roster

An evidence-weighted roster of Taipei and New Taipei metro vehicle families, procurement lots, partial identifiers and known renewal work.

VAL256

Taipei's original 102-car medium-capacity fleet — selected in 1988, built in 1991, reshaped after two test fires and later converted from Matra fixed-block control to Bombardier Cityflo 650.

SOLOMON203 [[HTTPS://COMMONS.WIKIMEDIA.ORG/WIKI/FILE:VAL256_LEAVING_DAAN_STATION_20220410.JPG](https://commons.wikimedia.org/wiki/File:VAL256_LEAVING_DAAN_STATION_20220410.JPG)] • **CC BY-SA 4.0** [[HTTPS://CREATIVECOMMONS.ORG/LICENSES/BY-SA/4.0/](https://creativecommons.org/licenses/by-sa/4.0/)]

BR

C370 (Bombardier Innovia)

C301

The 202-car Bombardier fleet built to extend the Matra railway without a transfer — with a four-country production chain and two conflicting published capacity measures.

H.T. YU [HTTPS://COMMONS.WIKIMEDIA.ORG/WIKI/FILE:A_BOMBARDIER_INNOVIA_APM_256_TRAIN_OF_TRTC_APPROACHING_LIUZHANGLI_STATION.JPG] • **CC BY-SA 2.0** [HTTPS://CREATIVECOMMONS.ORG/LICENSES/BY-SA/2.0]

BR

Taipei's first high-capacity fleet — 22 six-car trains whose failed first tender, design choices, trans-Pacific delivery and later renewals are recorded by DORTS and TRTC.

LOKSENG01 [HTTPS://COMMONS.WIKIMEDIA.ORG/WIKI/FILE:A_TAIPEI_METRO_C301_TRAIN_APPROACHING_ZHONGYI_STATION.JPG] • **CC BY-SA 4.0** [HTTPS://CREATIVECOMMONS.ORG/LICENSES/BY-SA/4.0]

R

C321

Thirty-six Siemens six-car trains procured in three lots — half locally assembled, later modified after a 2003 derailment and now receiving new propulsion equipment.

SINSYUAN [HTTPS://COMMONS.WIKIMEDIA.ORG/WIKI/FILE:C321_AT_ZHONGXIAO_XINSHENG_20250906.JPG] • **CC BY-SA 4.0** [HTTPS://CREATIVECOMMONS.ORG/LICENSES/BY-SA/4.0]

BL

C341

Six Siemens trains built for the Tucheng opening — DORTS's first rolling-stock design without a general consultant and the first Taipei fleet to use networked train control.

蒼空 翔 [HTTPS://COMMONS.WIKIMEDIA.ORG/WIKI/FILE:C341_1201_AT_XIMEN_STATION_20060531.JPG] • **CC BY-SA 3.0** [HTTPS://CREATIVECOMMONS.ORG/LICENSES/BY-SA/3.0]

BL

C371

Taipei Metro's 321-car Kawasaki procurement family — including 162 cars manufactured by Taiwan Rolling Stock through a complete-build-up industrial-cooperation programme.

KIRK [HTTPS://COMMONS.WIKIMEDIA.ORG/WIKI/FILE:C371_ON_TAMSUI_LINE_20090221.JPG] • **CC BY-SA 3.0** [HTTPTS://CREATIVECOMMONS.ORG/LICENSES/BY-SA/3.0]

C381

Twenty-three Kawasaki trains for the Xinyi and Songshan extensions plus one later six-car add-on — with 102 cars produced by Taiwan Rolling Stock.

A1998117TW [HTTPS://COMMONS.WIKIMEDIA.ORG/WIKI/FILE:TAIPEI_RAPID_TRANSIT_SYSTEM_-_C381_HIGH_CAPACITY_TRAIN.JPG] • **CC BY-SA 3.0** [HTTPS://CREATIVECOMMONS.ORG/LICENSES/BY-SA/3.0]

Depots

Stabling and maintenance facilities — location, capacity, and the lines and fleets they serve.

Muzha Depot

The original 6.2-hectare Wenhui facility — now the line's secondary depot, with 12 stabling roads, capacity for 84 married pairs and heavy-maintenance equipment for the 102-car Matra fleet.

玄史生 [HTTPS://COMMONS.WIKIMEDIA.ORG/WIKI/FILE:MUZHA_LINE_BETWEENTAIPEI_ZOO_STATION_AND_MUZHA_DEPOT.JPG] • **CC BY-SA 3.0** [HTTPS://CREATIVECOMMONS.ORG/LICENSES/BY-SA/3.0]

Neihu Depot

The Wenhui Line's 7.11-hectare main depot in Nangang — a 16-road, 144-pair facility with complete heavy-maintenance equipment for the 202-car Bombardier fleet.

TAIWANKENGO [HTTPS://COMMONS.WIKIMEDIA.ORG/WIKI/FILE:2021_NEIHU_DEPOT_I.JPG] • **CC BY-SA 4.0** [HTTPTS://CREATIVECOMMONS.ORG/LICENSES/BY-SA/4.0]

Beitou Depot

The Tamsui–Xinyi Line's level-five main depot — approximately 40–41 hectares of workshops, stabling and test track built on deeply compressible ground.

LOKSENG01 [https://commons.wikimedia.org/wiki/File:A_TAIPEI_METRO_C301_TRAIN_AT_BEITOU_DEPOT_01.JPG] • **CC BY-SA 4.0** [<https://creativecommons.org/licenses/by-sa/4.0/>]

Xindian Depot

The Songshan–Xindian Line's level-three main depot — crossed by the Xiaobitan branch and covered in part by a major over-site development.

USER:ALEXSH [https://commons.wikimedia.org/wiki/File:TAIPEI_MRT_XINDIAN_DEPOT1.JPG] • **CC BY-SA 3.0** [<http://creativecommons.org/licenses/by-sa/3.0/>]

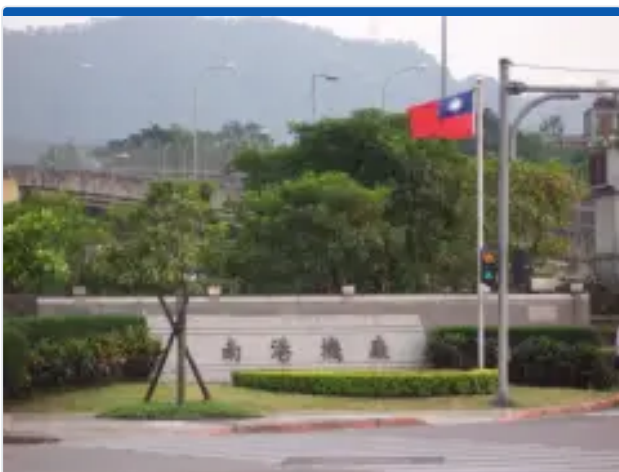

Xinzhuang Depot

The Zhonghe–Xinlu Line's level-three secondary depot — redesigned and reduced around preservation of the historic Losheng Sanatorium.

Tucheng Depot

The Bannan Line's level-four main depot — a 26.8-hectare maintenance complex built on former Dahan River flood-control land.

Nangang Depot

Luzhou Depot

The Bannan Line's level-three secondary depot — a narrow eastern facility rebuilt for flood resistance after Typhoon Nari inundated its tracks.

REPEAT [HTTPS://COMMONS.WIKIMEDIA.ORG/WIKI/FILE:%E5%8D%97%E6%B8%AF%E6%A9%9F%E5%BB%A0.JPG] • **CC BY-SA 2.5** [HTTPS://CREATIVECOMMONS.ORG/LICENSES/BY-SA/2.5]

The Zhonghe–Xinlu Line's level-four main depot — built beside the Tamsui River levee on difficult mixed fill, with a full workshop and test track.

TAIWANKENGO [HTTPS://COMMONS.WIKIMEDIA.ORG/WIKI/FILE:2020_LUZHOU_DEPOT.JPG] • **CC BY-SA 4.0** [HTTPS://CREATIVECOMMONS.ORG/LICENSES/BY-SA/4.0]

Zhonghe Depot

The Zhonghe–Xinlu Line's tiny secondary depot, built on the former TRA Zhonghe station site and limited by its 1.2-1.47 hectare footprint.

Circular Line South Depot

The Circular Line's main depot at Shisizhang, with a 14.33-hectare site and a smaller depot-layout boundary in official planning records.

JACKLAMF1D14 [HTTPS://COMMONS.WIKIMEDIA.ORG/WIKI/FILE:TAIPEI_MRT_CIRCULAR_LINE_SOUTH_DEPOT.JPG] • **CC BY-SA 4.0** [HTTPS://CREATIVECOMMONS.ORG/LICENSES/BY-SA/4.0]

Operations

Taipei Metro ridership and fare records, covering both TRTC and NTMC.

Taipei Metro ridership

2.1 million average daily riders in 2025, recovered to 97% of the pre-pandemic level — from TRTC's own performance report, plus NTMC's separately published per-line figures showing the Circular Line and its two light-rail lines all posting record ridership a year after a 2024 earthquake shut the Circular Line down.

Taipei Metro fares

A 10-band distance fare from NT\$20 to NT\$65 — with the operator's own site stating plainly that an EasyCard costs exactly the same as a paper token today, contradicting the common assumption that stored-value cards are cheaper, plus a genuine conflict between TRTC and NTMC over how many social-welfare points a senior or disability card carries each month.

Facilities

Taipei Metro accessibility provisions, on trains and at stations.

Taipei Metro accessibility

The first mass-transit system in Taiwan to adopt accessibility facilities, per the operator's own account — set against a 2023 city inspection that found every one of 81 checked accessibility facilities failed, and a Control Yuan finding that TRTC fined a disabled passenger without reviewing the footage that would have cleared him.

The 捷運 network as this site files it: TRTC's lines, New Taipei Metro's Circular, Sanying and light rail lines, and Taoyuan Metro's Airport MRT. Three companies, and from a rider's point of view one railway — one stored-value card, one interchange network, one station-numbering scheme, one map.

That is the boundary this system draws, and it is the boundary the fare system draws. It is not drawn by technology: the network contains rubber-tyred metro, steel-wheel metro and street-running light rail, and none of those is a reason to file a line somewhere a rider would not look for it. Taiwan Railway and high speed rail are outside it because they are separate networks with separate ticketing, separate stations and separate operators — not because they are a different kind of train.

The ridership [\[/rail/metro/operations/ridership/\]](/rail/metro/operations/ridership/) and fare [\[/rail/metro/operations/fares/\]](/rail/metro/operations/fares/) records cover what TRTC and NTMC each publish about their own networks — including a genuine, unresolved conflict between the two operators over a widely-used social-welfare benefit. The accessibility record [\[/rail/metro/facilities/accessibility/\]](/rail/metro/facilities/accessibility/) covers what the operator states about its network, and a city inspection that did not agree with it.

Station names, codes and sequence from TDX Transport Data eXchange, Ministry of Transportation and Communications, operators TRTC, NTMC, TYMC, and TMRT. Government open data. Retrieved 2026-08-22; source last updated 2016-11-23. The 12 Sanying station records absent from TDX are sourced directly to New Taipei Metro and government publications on their pages. Provenance.
