Depots

Stabling and maintenance facilities — location, capacity, and the lines and fleets they serve.

Muzha Depot

Where the network started — the first depot Taipei ever built for a metro, and demoted in 2009 from the whole of the system's engineering capability to the junior of two.

BR

Neihu Depot

The line's main workshop — named after a district it is not in, and joined to the running line at the opposite end from the station that shares its name.

BR

Beitou Depot

Xindian Depot

The network's first construction site and its principal depot — where the high-capacity system began, and where new fleets are still commissioned first.

LOKSENG01 [HTTPS://COMMONS.WIKIMEDIA.ORG/WIKI/FILE:A_TAIPEI_METRO_C301_TRAIN_AT_BEITOU_DEPOT_01.JPG] • **CC BY-SA 4.0** [HTTPS://CREATIVECOMMONS.ORG/LICENSES/BY-SA/4.0]

The green line's depot — with a metro branch line climbing through the middle of it.

Xinzhuang Depot

The orange line's depot, built on the grounds of the Losheng Sanatorium — the most contested piece of land in the network's history.

Tucheng Depot

The Bannan Line's western depot.

Nangang Depot

The Bannan Line's eastern depot.

Luzhou Depot

The orange line's northern depot, at the end of the Luzhou arm.
