Sanying Line

New Taipei's newest railway — a driverless elevated line to Sanxia and Yingge, open five weeks and still free to ride, written up here while every English source is still a machine translation.

SANYING LINE			
OPERATOR New Taipei Metro Corporation ^[1]	DISTRICTS Tucheng, Sanxia, Yingge ^[1]	OPENED 30 June 2026 ^[1]	FREE TRIAL UNTIL 31 August 2026 ^[1]
STATIONS 12 ^[1]	STRUCTURE Fully elevated ^[3]	AUTOMATION Driverless ^[1]	INTERCHANGES Dingpu (Bannan Line), Yingge (TRA) ^[1]

Taiwan opened a new railway five weeks ago and, as of this page's writing, you can still ride it for nothing: tap in with any stored-value card and the fare is zero until the end of August^[1]. The Sanying Line is New Taipei's own metro — built by the city, run by its own metro company — and it gives Sanxia and Yingge, two districts that have watched the MRT map grow around them for thirty years, stations of their own.

What opened, exactly

The line runs 14.29 km on a fully elevated alignment through Tucheng, Sanxia and Yingge, with 12 stations^[1] ^[3]. Trains are driverless, two-car sets^[3], running about every 6 minutes at peak and 8 off-peak, and the end-to-end run takes roughly half an hour^[1].

It connects to the rest of the network at both ends of its purpose: at Dingpu, riders change to the Bannan Line [\[/rail/lines/bannan-line/\]](/rail/lines/bannan-line/) and the Taipei core; at Yingge, to the TRA main line^[1]. That pair of transfers is the line's argument — the districts it serves previously reached the MRT by bus or car, and the city's stated case for the line is the commuting time it removes.

Service opened on 30 June 2026, with the first train in the early afternoon and a **free trial period to 31 August**: any electronic stored-value card tapped in and out rides free^[1]. Trial hours began at 10:00–20:00 and were extended from the start of August to 08:00–22:00^[3] — worth knowing, because most guidance still quotes the original shorter day. When charging begins, fares run NT\$20 to NT\$35 by distance^[1].

The first month

The operator's engineering bureau put the first month's ridership at over **750,000 journeys**^[2] — for a two-car driverless line serving two outer districts, on restricted hours, a figure that surprised the line's own planners into saying so publicly.

On 25 July the city unveiled an **indigenous-themed painted train**: Amis clothing patterns on the exterior, an interior built around Amis weaving culture, and character figures from the Atayal and Paiwan peoples^[2]. No published schedule says when it runs, which is presumably part of why chasing it has become a small local sport — but that last observation is this page editorialising, not a sourced claim.

What is not yet on this page

- **Rolling stock detail.** The trains are reported as Hitachi-built, but the accounts found so far disagree on which Hitachi plant built them, and the fleet size and speed figures circulating are single-source. A dedicated rolling stock page waits until the operator's or builder's own record can be cited. Marked TBC above rather than borrowed.
- **The depot.** zh.wikipedia names 三峽機廠 in Sanxia^[3]; nothing else about it is established here yet.
- **Station data.** This site's station registry, maps and geometry come from the government TDX platform, and the Sanying Line's stations are not yet in the extract this site builds from. Integrating them — codes, coordinates, interchanges, a strip map for this page — is the next data task, and until then this page deliberately has no station list rather than a hand-typed one.
- **The extension.** An extension toward Bade in Taoyuan has Executive Yuan approval^[3]; its state of construction is not established here.

Why this page exists already

This site's usual pattern is depth before breadth — one line finished properly before the next is started. The Sanying Line jumps the queue for a reason: it is five weeks old, English coverage is effectively nonexistent, and the facts above are the ones that rot fastest — trial dates, hours, fares. They are cited to the operator's own announcement, snapshotted, and dated, so that when the trial ends this page can say what changed rather than quietly rewriting itself.

Specifications

Route length	14.29 km ^[1]
Stations	12 ^[1]
End-to-end journey	30 min ^[1]
Peak headway	6 min ^[1]
Off-peak headway	8 min ^[1]
Base fare	20 NT\$ ^[1]
Maximum fare	35 NT\$ ^[1]
Cars per train	2 ^[3]
Fleet size	TBC
Maximum speed	TBC
