

The network

7 lines, 157 stations, drawn from Taiwan MOTC route geometry. Colours are the official ones each operator publishes — not the values circulating in English-language sources, which are all slightly wrong.

Every line as surveyed, each labelled with its code at both ends — colour alone does not identify a line, and two of these seven are indistinguishable to a reader with protanopia. Interchange stations are ringed in black; termini are the outer dots. Where a line appears broken, the alignment across the gap is missing from the published geometry — those breaks are holes in the source data, not features of the network, and are left unbridged rather than joined with track we cannot evidence.

Lines

LINE	STATIONS	TERMINI	END TO END	LENGTH	MEASURED	OPERATOR
 Wenhu 文湖線	24	 → 	45 min	25.17 km	25.0 km	TRTC
 Tamsui-Xinyi 淡水信義線	28 incl. branch	 → 	54 min	28.24 km	≥ 27.4 km	TRTC
 Songshan-Xindian 松山新店線	20 incl. branch	 → 	37 min	18.77 km	≥ 18.0 km	TRTC

LINE		STATIONS	TERMINI	END TO END	LENGTH	MEASURED	OPERATOR
0	Zhonghe-Xinlu 中和新蘆線	26 incl. branch	001 → 021	48 min	24.11 km 	≥ 24.1 km	TRTC
BL	Bannan 板南線	23	BL01 → BL23	48 min	26.65 km 	26.6 km	TRTC
Y	Circular 環狀線	14	Y07 → Y20	34 min	15.06 km 	≥ 12.2 km	NTMC
A	Airport MRT 桃園機場捷運線	22	A1 → A22	84 min	51.76 km 	≥ 52.6 km	TYMC

Length is official; Measured is ours. The operators publish a route length through TDX — as a running total against the last station of each route, not in the route-length field, which is zero throughout. Measured is computed independently from the surveyed geometry, taken between the outermost stations because the published alignment runs on past both termini into depot leads and tail track. The two agree to within about 150 m on every line whose geometry is continuous, which is the point of printing both: the check is visible rather than asserted. Both columns describe the trunk route only, so a line's branch is excluded from each. A ≥ marks a line whose geometry arrives in discontinuous runs — the track crossing each gap is absent from the source, so our figure is a floor, and the shortfall against the official column measures how much is missing: 0.8 km on the Tamsui–Xinyi Line, 2.8 km on the Circular. End-to-end times are MOTC's own.

Interchanges

18 places where you can change lines. Each carries a different code on each line it serves, which is exactly what the badge system makes legible.
