Danan Guandu charging depot

Danan Bus's Guandu electric-bus charging procurement record.

DANAN GUANDU CHARGING DEPOT			
OPERATOR Danan Bus ^[2]	PUBLISHED LOCATION Guandu [/rail/metro/stations/r25/] station area ^[1]	PLANNED PARKING SPACES 74 ^[2]	CLASS A / B SPACES 42 / 32 ^[2]
COMPLETION DEADLINE IN PROCUREMENT 15 July 2026 ^[2]			

Overview and procurement record

Danan's contact directory names Guandu [/rail/metro/stations/r25/] as one of its operating sites and describes it at a road intersection rather than publishing a full street address ^[1]. A separate Danan procurement specification describes an electric-bus parking and charging project for 74 spaces, split into 42 Class A and 32 Class B spaces ^[2].

The specification uses 350-kWh and 200-kWh battery assumptions for the two classes and gives 15 July 2026 as the completion deadline ^[2]. Those are procurement requirements, not evidence that construction finished or that buses were assigned to specific routes ^[2].

The A/B split is a parking-and-charging design distinction: 42 spaces are classified A and 32 are classified B in the tender, while the battery figures are assumptions used for the electrical design ^[2]. The document therefore supports the planned scale of the project and the load it was designed to serve, but not the number of chargers ultimately installed, the connector standard or the number of buses that can charge simultaneously ^[2].

Guandu is also a named Danan operating site in the company directory, which is stronger evidence for the location context than inferring a depot from a route terminus ^[1]. The directory does not give a street number for the site, and the tender does not attach route numbers to individual spaces ^[1] ^[2].

The deadline is likewise a contractual milestone rather than an opening date ^[2]; the tender does not say that buses began using the spaces on 15 July 2026 ^[2]. A completion certificate or later operating notice is needed before the planned 74 spaces can be described as an active depot ^[2].

A separate, already-completed Danan charging depot, at Beitou

Guandu is not Danan's only electric-bus charging project, and the other one is finished.^[3] Taipei [\[/rail/thsr/stations/taipei/\]](/rail/thsr/stations/taipei/) City Government's Department of Transportation announced, in a release fetched in full, that a shared electric-bus charging facility at the Taipei MRT's own Beitou [\[/rail/metro/stations/r22/\]](/rail/metro/stations/r22/) depot opened on 2 July 2025, with Mayor Chiang Wan-an attending: 「大南汽車公司負責整體設施建置」 — Danan Bus was responsible for the whole facility's construction.^[3] The release gives 11 charging posts and 22 charging bays, 「設置11個充電柱、22個充電席位」, with fire-safety provisions including mobile mist-spray equipment and lithium-battery-specific extinguishers.^[3] Route 288 (21 buses, serving Shilin [\[/rail/metro/stations/r16/\]](/rail/metro/stations/r16/)) converted to electric operation simultaneously, and the citywide electric-bus total reached 886 vehicles at that point.^[3] This Beitou facility uses a different classification scheme (posts and bays) than the Guandu tender's Class A/B space split, and no source states that they are directly comparable measurements of the same kind of thing.^[3]^[2]

Gaps

The Guandu tender's own stated completion deadline was 15 July 2026, a date this page's own research pass, conducted 29 August 2026, falls after.^[2] Danan's own news archive and a direct search of the city Traffic Bureau's own site turned up no completion or opening announcement for the Guandu facility specifically as of this research pass — a genuine absence, checked rather than assumed, though it does not rule out an announcement existing somewhere this search did not reach.^[2] The fetched sources do not establish an opening date, current completion status, the depot's final address, route allocation, charger manufacturer or operating capacity beyond the planned parking-space count^[1]^[2]. Those fields remain TBC until a completion notice, as-built record, current depot register or route-allocation document is fetched^[2].

Specifications

Current completion status	TBC
Route allocation	TBC
Opening date	TBC

臺北捷運北投機廠電動公車共享充電場域正式啟用

PRIMARY Taipei City Government Department of Transportation (臺北市政府交通局) accessed 2026-08-29

Fetches in full. Announces a separate, already-completed Danan-built shared charging facility at the Taipei MRT's own Beitou depot, opened 2 July 2025, attended by Mayor Chiang Wan-an. States Danan Bus built the whole facility (「大南汽車公司負責整體設施建置」), with 11 charging posts and 22 charging bays (「設置11個充電柱、22個充電席位」) and advanced fire-safety equipment including mobile mist-spray systems and lithium-battery-specific extinguishers. States route 288 (21 buses, serving Shilin) converted to electric simultaneously, and that the citywide electric-bus total reached 886 at that point.
