Imported diesel bus and coach chassis

Six imported brands — Hino, Isuzu, Mercedes-Benz, Volvo, Scania, MAN — supply the chassis for Taiwan's highway coaches and part of its city-bus fleet, bodied by domestic coachbuilders. Only one of the six has a confirmed public government type-approval trail.

IMPORTED DIESEL BUS AND COACH CHASSIS			
HINO TAIWAN DISTRIBUTOR 和泰汽車 (Hotai Motor), since 1952 ^[1]	ISUZU TAIWAN DISTRIBUTOR 台北合眾汽車有限公司 ^[4]	MERCEDES-BENZ TAIWAN DISTRIBUTOR 裕益汽車股份有限公司 (順益集團) ^[7]	VOLVO TAIWAN DISTRIBUTOR 太古商用汽車 (Taikoo Motors Group), since 1978 ^[12]
SCANIA TAIWAN DISTRIBUTOR 永德福汽車 ^[18]	MAN TAIWAN DISTRIBUTOR 德曼汽車集團, exclusive from 1 July 2018 ^[21]		

Six imported brands supply the chassis for Taiwan's highway coaches, charter/tour coaches and part of its city-bus fleet — Taiwanese coachbuilders construct the bodies. Only one of the six, MAN, has a confirmed public government type-approval document trail; the rest were searched for and not found on the one relevant VSCC page located, "大客車底盤重心位置圖"^[22]. Whether that absence means the records exist elsewhere, or simply are not published in a searchable list the way the electric-bus programme's are, is unresolved.

Hino

和泰汽車 (Hotai Motor) has been Hino's Taiwan distributor since 1952^[1], and its joint venture 國瑞汽車 (Kuo-zui Motors, Toyota 65%/Hotai 30%/Hino 5%, founded 1984) assembles Hino buses domestically^[1]. 長源汽車 (Chang Yuan Motor) is Hotai Group's dealer specialising in Hino/Toyota commercial vehicles, with 17 branches nationwide^[3]. Hotai's current live product site lists two large-bus chassis: **RK2ARXA-PJF** (A05C-TL engine, 260ps, 14,500kg GVW) and **RM1ASXU** (a 360-horsepower class, A09C-VN engine, 18,000kg GVW)^[2]. A low-floor city-bus chassis, the HS8J (Taiwan's first Japanese-brand low-floor bus, launched late 2015) and its Euro-6 successor HS2A (2020), does not currently appear in the live site's navigation — whether discontinued or a rendering limit on this research pass's fetch is unresolved.

Isuzu

台北合眾汽車有限公司 is the current distributor, though sources conflict on when its agency began: 2014 per the distributor's own "About" page^[4], or 2012 per an independent account that also gives a fuller history — first Taiwan exports in 1952, domestic manufacture 1996–2007 halted after the then-manufacturer's parent bank collapsed in a 2007 fraud scandal^[6]. Current chassis, fetched directly from the live site: **NQR(Bus) 8.5t** (4HK1 engine, 190PS, Euro-5-equivalent without urea injection) and **LT Bus 14.5t**^[5]. No full-size route-bus or highway-coach Isuzu model (Erga, Gala, Journey) was found sold or deployed in Taiwan.

Mercedes-Benz

裕益汽車股份有限公司, part of 順益集團 (Shun Yi Group, founded 1967), is the general distributor for large Mercedes-Benz buses^[7]. The **O500** coach (OM457 engine, 428ps/315kW, MB GO240-8 transmission) launched in 2018^[8] ^[9]. The **OC500** — Daimler's first bus designed specifically for Taiwan, chassis and body together, locally assembled — launched 10 March 2021 in 33/35/36/45-seat configurations^[10]; its power/torque figures are numerically identical to the O500's despite a different engine (OM470) and a different peak-power rpm, an unresolved peculiarity in the source, not smoothed over here. Deployment is charter/tour/contract work: 文境通運旅遊 集團 received the 500th OC500 delivered under this programme on 21 February 2025, operating 312 vehicles for hospital, government, corporate and school shuttle and rental contracts^[11]. No source found names a Mercedes-Benz bus in fixed public-route service.

Volvo

太古商用汽車 (Taikoo Motors Group) has distributed Volvo trucks and buses in Taiwan since 1978^[12]. 大吉汽車 (Daji Motors, founded 1975) has been Volvo's sole certified Taiwan coachbuilder since 2014, currently building the New B8R, B8RLE and All New B13R^[13]; its **B11R** (Euro 6, 460hp) uses a Volvo D11 engine and 12-speed I-Shift transmission^[14]. Separately, 唐榮車輛科技 (Tang Eng Vehicle Technology — see its unrelated electric-bus "Alighter" on its own page [\[/bus/models/tang-eng-alighter/\]](/bus/models/tang-eng-alighter/)) was licensed by Volvo in 2004 as its 16th global assembly plant, building roughly 2,000 Volvo trucks and buses at Luzhu, Kaohsiung under a 1,350-unit contract that ended November 2011^[17]; Tang Eng's own site has been unreachable across two independent research passes.

A conflict, published not resolved: Daji's own client list names 國光客運 (Kuo-Kuang Motor Transport) as a Volvo-body recipient, and zh.wikipedia's article on Daji repeats this^[15]. But zh.wikipedia's own article on 國光客運, as of its stated December 2024 fleet snapshot, lists only Daewoo models and makes no mention of Volvo^[16]. Neither source explains the discrepancy.

Scania

永德福汽車 is Scania's current Taiwan distributor, confirmed on Scania Taiwan's own site^[18]. An unfootnoted wiki account states Scania took back general-agency rights from a previous distributor at the end of 2005 and invested NT\$600 million building 10 service centres from 2006^[19]. **K400IB4X2NB** and **K380IB4X2NB** coaches are used by 統聯客運 (Tonglian/Ubus)'s dedicated tour-coach subsidiary, which reportedly bought 30 Scania units in 2012 — but this rests on an unfootnoted wiki claim not corroborated by the operator's own site, which names no vehicle brand at all^[20].

MAN

德曼汽車集團 (Deman Auto Group) has held exclusive Taiwan distribution for MAN Truck & Bus since 1 July 2018, achieving second place in Type-A coach sales within its first half-year and 400 units sold within eighteen months^[21]. MAN is the only one of these six brands with confirmed public Taiwan government type-approval documents found this pass: the **19.400** and **19.510** coach chassis both carry VSCC centre-of-gravity certification documents^[22]. Deman's coach subsidiary, 德揚實業, markets four MAN-based body/finish variants under Taiwanese coachbuilder names, though no engine or seating specification is given on its own marketing pages^[23].

Specifications

VSCC public type-approval trail found	MAN only, of the six brands checked ^[22]
Hino current large-bus chassis	RK2ARXA-PJF, RM1ASXU ^[2]
Isuzu current bus chassis	NQR(Bus) 8.5t, LT Bus 14.5t ^[5]
Mercedes-Benz current coach	0500, 0C500 ^[10]
Volvo current coach	New B8R, B8RLE, A11 New B13R ^[13]
