

Bus models

Sourced bus vehicle records, propulsion evidence and the fields that remain unpublished.

The committed TDX bus pull has no vehicle-model field, so a model page is published only where a fetched operator, regulator or government source names the vehicle ^[1].

Electric buses now have a government type-approval register — the VSCC qualified-model registry `[/bus/models/vsc-qualified-registry/]` — naming every manufacturer and model code MOTC has certified, alongside the manufacturer-level pages below ^[5]:

- VSCC qualified-model registry `[/bus/models/vsc-qualified-registry/]` — every manufacturer and type code MOTC/VSCC has certified, read directly from three dated disclosure PDFs ^[5].
- Model T electric bus `[/bus/models/model-t-electric/]` — made by Foxtron (鴻華先進科技), not Tron Energy; 13 San Chung Bus vehicles on route 857, with a dated municipal subsidy record ^[2].
- RAC-700 (Tron Energy) `[/bus/models/rac-700/]` — RAC Electric Vehicles Inc.'s current model, with a VSCC type-code history spanning four generations and conflicting older-generation specs ^[5].
- Master electric bus family `[/bus/models/master-bus-electric/]` — Master Transportation's four electric bus body types, full specs from the manufacturer's own model page, with an unreconciled delivery record ^[5].
- Alighter (Tang Eng) `[/bus/models/tang-eng-alighter/]` — exported to Guatemala, but absent from every VSCC qualified-model list checked, contradicting a 2021-era qualification claim ^[5].
- Imported diesel bus and coach chassis `[/bus/models/imported-diesel-chassis/]` — Hino, Isuzu, Mercedes-Benz, Volvo, Scania and MAN, their Taiwan distributors and current models; only MAN has a confirmed public government type-approval trail ^[6].
- Taiwan Yutong 6128HG `[/bus/models/yutong-6128hg/]` — one Dàyou vehicle identified in a safety report, with seat and standing figures ^[3].
- King Long / 大金龍 `[/bus/models/king-long/]` — Dàyou's official fleet page names year groups and route classes, but not a complete technical roster ^[4].
- CNG buses `[/bus/models/cng-buses/]` — one documented six-vehicle Taipei pilot in 1999, no manufacturer named anywhere, and no VSCC type-approval trail for the fuel type at all.
- Historic and domestic manufacturers `[/bus/models/historic-manufacturers/]` — two dated 1970s/80s fleet purchases, and the domestic coachbuilders that bodied imported chassis after privatisation, with a genuine unresolved conflict on one closure date.

Manufacturer, chassis/body, passenger capacity and propulsion are not silently inferred from a trade name or a photograph. Where the source does not publish them, the entity page says TBC ^[1].

10 entries

Alighter (Tang Eng)

Tang Eng Vehicle Technology's CTP-alliance electric bus, exported to Guatemala but absent from Taiwan's own VSCC qualified-model register.

CNG buses

Compressed natural gas never took hold in Taiwan's bus fleets — one documented six-vehicle Taipei pilot in 1999, no VSCC type-approval trail, and no source naming a manufacturer.

Historic and domestic bus manufacturers

What Taipei's buses actually were before the current import-and-electrify era — two dated 1970s/80s fleet purchases, and the domestic coachbuilders that bodied imported chassis after privatisation.

Imported diesel bus and coach chassis

Six imported brands — Hino, Isuzu, Mercedes-Benz, Volvo, Scania, MAN — supply the chassis for Taiwan's highway coaches and part of its city-bus fleet, bodied by domestic coachbuilders. Only one of the six has a confirmed public government type-approval trail.

	King Long King Long year-group and route-class records from Dàyou Bus's official fleet page.
	Master electric bus family Master Transportation (成運汽車製造)'s four electric bus body types, with VSCC-registered models and an unreconciled delivery record.
	Model T electric bus Foxtron's Model T, recorded by New Taipei for San Chung Bus route 857.
	RAC-700 (Tron Energy) RAC Electric Vehicles Inc. (華德動能科技)'s current electric bus, with VSCC type-approval history spanning four model codes.
	Taiwan Yutong 6128HG A Taiwan Yutong 6128HG identified in the Dàyou Bus collision factual report, with chassis specifications from a separate VSCC certification filing.
	VSCC electric bus qualified-model registry The government type-approval register of Taiwan's qualified electric bus manufacturers and models, read directly from VSCC's own disclosure PDFs.
