Formosa Boulevard (R10) — Kaohsiung Metro

Formosa Boulevard (美麗島), TDX station **R10**, with current KRTC line membership, coordinates and source update fields.

FORMOSA BOULEVARD (R10) — KAOHSIUNG METRO			
STATION ID	TRADITIONAL CHINESE NAME	LINE MEMBERSHIP	ADMINISTRATIVE CITY
R10 ^[1]	美麗島 ^[1]	Red Line [/rail/metro/lines/tamsui-xinyi-line/] (R) ^[2]	高雄市 ^[1]

Current identity

Formosa Boulevard (美麗島) is station ID **R10** in the KRTC TDX Station response retrieved on 2026-08-24. ^[1] The record supplies the operator station UID, English and Traditional Chinese names, address, city, district, coordinates, station-class field and source update time. ^[1] This page reports those fields as the source publishes them and does not convert the station-class code into an unsupported passenger-service ranking. ^[1]

The TDX address is 高雄市新興區中山一路115號地下一樓, in 高雄市's 新興區. ^[1] The coordinate returned by the same record is 22.631393, 120.301994. ^[1] An address and a coordinate describe different reference fields, so neither is substituted for the other. ^[1] Platform orientation, station depth, entrances, track count and surrounding walking catchment are TBC on this page because those details are not fields in the committed Station record. ^[1] ^[6]

Position in the metro network

The current StationOfRoute data places this station on Red Line (R). ^[2] In the Red Line direction-zero sequence it is position 9, with a cumulative distance of 9.84 km. ^[2] The preceding member is Central Park (**R9**), and the following member is Kaohsiung Main Station (**R11**). ^[2] These are relationships in the published ordered dataset, not a claim that every train stops in exactly the same pattern at all times. ^[2] ^[4]

The operator's English guide map names this station in the Red Line list. ^[5] Where a station is a transfer point, the line-transfer dataset is the stronger source for the interchange relationship; the current pull identifies the Formosa Boulevard transfer between **05** and **R10**. ^[3] A same-name relationship without a LineTransfer record is not promoted into a transfer claim. ^[3]

Service, facilities and access

The KRTC first/last-timetable pull contains 304 station-direction rows for the operator, with service-day and destination fields.^[4] The current page does not manufacture a first or last train time from a blank row, nor does it collapse workday and holiday records into a single schedule.^[4] Detailed headways, actual and design capacity, station accessibility facilities, tactile paths, lifts, toilets, nursing rooms, platform gap, screen doors and station staffing remain TBC until the operator's station-level material is transcribed.^[4]^[6]

Historical and ridership boundary

The government Red/Orange project page gives system-level route, station-count and transfer context, but it does not by itself supply this station's opening chronology, rebuild history, construction dispute or current ridership row.^[7] Those claims are therefore TBC here rather than inferred from the station's current name and coordinate.^[7]^[1] The station page is ready for later primary-source additions because its current identity and route sequence are anchored to stable source IDs.^[1]^[2]

This station is consequently a reference entry, not a departure board. The current structured data establishes identity, position, membership and source fields; operations, facilities, ridership and detailed history remain explicit research work.^[1]^[2]^[4]

Specifications

Latitude	22.631393 degrees ^[1]
Longitude	120.301994 degrees ^[1]
Red Line sequence	9 position ^[2]
Red Line cumulative distance	9.84 km ^[2]
