

National modal share

MOTC's 2024 National Travel Survey — the year rail's mode share passed bus for the first time, public transit still below its 2020 pre-pandemic peak, and a public-transit share that ranges from 38.3% in Taipei City to 3.3% in Nantou.

NATIONAL MODAL SHARE			
MOTORCYCLE/SCOOTER SHARE OF TRIPS, 2024 43.7% ^[1]	PRIVATE CAR SHARE OF TRIPS, 2024 26.6% ^[1]	RAIL SHARE OF TRIPS (MRT + THSR + TRA), 2024 6.6%, first time rail exceeded bus ^[1]	BUS SHARE OF TRIPS, 2024 6.0% ^[1]
PUBLIC-TRANSIT SHARE OF TRIPS, 2024 15.2%, up from 14.3% in 2022 but still below 16.0% in 2020 ^[1]	PRIVATE MOTORISED SHARE OF TRIPS, 2024 72.0% ^[1]	HIGHEST-TRANSIT-SHARE CITY, 2024 Taipei [/rail/thsr/stations/taipei/] City, 38.3% ^[1]	LOWEST-TRANSIT-SHARE COUNTIES, 2024 Changhua [/rail/thsr/stations/changhua/] 3.4%, Nantou 3.3% ^[1]
SURVEY PERIOD AND SAMPLE 1 September to 31 December 2024, effective sample 34,236, telephone survey (landline and mobile) of persons aged 15+ ^[1]			

MOTC's Department of Statistics runs a recurring National Travel Survey (民眾日常使用運具狀況調查) measuring how people in Taiwan actually travel on a typical day. The most recent wave surveyed 1 September to 31 December 2024 by telephone (landline and mobile), reaching an effective sample of 34,236 people aged 15 and over.^[1]

The 2024 figures

By share of trip-legs, motorcycles and scooters remain the largest single mode at 43.7%, down from 45.8% in the 2022 survey.^[1] Private cars are second at 26.6%, up from 25.0%.^[1] Walking holds essentially steady at 9.9% (was 10.0%).^[1]

The notable shift is in rail. Combined MRT, THSR and TRA travel reached a 6.6% mode share in 2024, up from 5.5% in 2022 — and the survey's own summary states this is the first time rail's share has exceeded bus, which held steady at 6.0% across both surveys: 「『軌道運輸』市占率6.6%則首次超越汽車客運」.^[1] Bicycles fell slightly to 2.7% (from 3.0%) and taxis to 2.5% (from 2.7%).^[1]

The aggregate picture, and a recovery that is not complete

Grouped into broader categories, public transit's overall trip-leg share rose to 15.2% in 2024 from 14.3% in 2022 — a real year-on-year gain the survey states directly — but the same report notes this remains below the 16.0% recorded in 2020, before pandemic-era travel patterns depressed transit use: 「113年我國運具次數之公共運輸市占率為15.2%...較111年調查結果之14.3%，增加0.9個百分點...惟仍未達109年之16.0%水準」.^[1] Private motorised transport (cars, scooters and other private vehicles) accounted for 72.0% of trips in 2024, essentially flat against 72.3% in 2022.^[1]

A national figure that hides a large regional split

The national public-transit share obscures wide variation between cities and counties. Taipei [\[rail/thsr/stations/taipei/\]](http://rail.thsr/stations/taipei/) City posts by far the highest transit share at 38.3%, followed by Keelung (33.4%) and New Taipei (29.0%).^[1] At the other end, Nantou (3.3%) and Changhua [\[rail/thsr/stations/changhua/\]](http://rail.thsr/stations/changhua/) (3.4%) post the lowest transit shares in the country — meaning a resident of Taipei is roughly eleven times more likely to travel by public transit on a given day than a resident of Nantou, per this same survey wave.^[1] The survey also records how many people leave home at all on a typical surveyed weekday, which itself rose to 76.1% in 2024 from 73.4% in 2022.^[1]

What remains TBC

This page reports mode share by share of trip-legs, which is what the survey itself leads with; a national aggregate ridership figure summing absolute passenger counts across every mode and operator was not found in this survey and would need to be separately reconstructed from operator-by-operator annual reports, most of which this site already covers on their own pages.

Specifications

Share who left home on a weekday, 2024	76.1 % [1]
Share who left home on a weekday, 2022	73.4 % [1]

The full official survey report, published June 2025, covering the September-December 2024 survey wave. Gives mode-share-by-trip-leg figures for 2024 against 2022: motorcycle 43.7%/45.8%, private car 26.6%/25.0%, walking 9.9%/10.0%, rail 6.6%/5.5% (『軌道運輸』市占率 6.6%則首次超越汽車客運, rail exceeding bus for the first time), bus 6.0%/6.0%, bicycle 2.7%/3.0%, taxi 2.5%/2.7%. Aggregate categories: public transit 15.2%/14.3% (2020: 16.0%), private motorised 72.0%/72.3%, non-motorised 12.8%/13.4%. By-city public-transit share: Taipei City 38.3% (highest), Keelung 33.4%, New Taipei 29.0%, Taoyuan 12.9%, Kaohsiung 10.2%; lowest Yunlin 3.8%, Changhua 3.4%, Nantou 3.3%. Survey conducted 1 September-31 December 2024, effective sample 34,236, persons aged 15+; the share who left home on a surveyed weekday (外出比率) was 76.1% versus 73.4% in the 2022 survey.
