Taichung Metro

Taichung's Green Line — a single steel-wheel, driverless metro linking Beitun, the city centre and the HSR station.

Stations

18 pages

Every station on this network, grouped by line — generated from the same registry that draws the maps.

Lines

The Green Line's route, construction packages, engineering and operating record.

Green Line

Taichung's 18-station driverless railway from Beitun Main Station to HSR Taichung Station.

Rolling Stock

Taichung Metro's Green Line fleet — car dimensions, capacity and the consortium behind the trains.

Taichung Metro rolling stock

18 two-car EMUs, dimensioned down to the centimetre by the operator's own FAQ — built under a three-firm consortium contract that never says which firm actually made the cars.

Stations

Eighteen Green Line stations in TDX running order, with their siting, contract context and published station design.

G0 Beitun Main Station

G0 Beitun Main Station (北屯總站) — stop 1 of 18 on Taichung Metro's Green Line, in 北屯區.

G3 Jiushe

G3 Jiushe (舊社) — stop 2 of 18 on Taichung Metro's Green Line, in 北屯區.

G4 Songzhu

G4 Songzhu (松竹) — stop 3 of 18 on Taichung Metro's Green Line, in 北屯區.

G5 Sihwei Elementary School

G5 Sihwei Elementary School (四維國小) — stop 4 of 18 on Taichung Metro's Green Line, in 北屯區.

G6 Wenxin Chongde

G6 Wenxin Chongde (文心崇德) — stop 5 of 18 on Taichung Metro's Green Line, in 北屯區.

G7 Wenxin Zhongqing

G7 Wenxin Zhongqing (文心中清) — stop 6 of 18 on Taichung Metro's Green Line, in 北區.

G8 Wenhua Senior High School

G8 Wenhua Senior High School (文華高中) — stop 7 of 18 on Taichung Metro's Green Line, in 西屯區.

G8a Wenxin Yinghua

G8a Wenxin Yinghua (文心櫻花) — stop 8 of 18 on Taichung Metro's Green Line, in 西屯區.

G9 Taichung City Hall

G9 Taichung City Hall (市政府) — stop 9 of 18 on Taichung Metro's Green Line, in 西屯區.

G10 Shui-an Temple

G10 Shui-an Temple (水安宮) — stop 10 of 18 on Taichung Metro's Green Line, in 南屯區.

G10a Wenxin Forest Park

G10a Wenxin Forest Park (文心森林公園) — stop 11 of 18 on Taichung Metro's Green Line, in 南屯區.

G11 Nantun

G11 Nantun (南屯) — stop 12 of 18 on Taichung Metro's Green Line, in 南屯區.

G12 Feng-le Park

G12 Feng-le Park (豐樂公園) — stop 13 of 18 on Taichung Metro's Green Line, in 南屯區.

G13 Daqing

G13 Daqing (大慶) — stop 14 of 18 on Taichung Metro's Green Line, in 南區.

G14 Jiuzhangli

G14 Jiuzhangli (九張犁) — stop 15 of 18 on Taichung Metro's Green Line, in 烏日區.

G15 Jiude

G15 Jiude (九德) — stop 16 of 18 on Taichung Metro's Green Line, in 烏日區.

G16 Wuri

G16 Wuri (烏日) — stop 17 of 18 on Taichung Metro's Green Line, in 烏日區.

G17 HSR Taichung Station

G17 HSR Taichung Station (高鐵臺中站) — stop 18 of 18 on Taichung Metro's Green Line, in 烏日區.

Technology

Taichung Metro train-control, automation and system-equipment contract records.

Taichung Metro signalling and automation

The operator calls it fully automatic driverless operation, but names no GoA grade and no signalling product — a three-firm consortium built the whole system-equipment package under six unbranded subsystem names.

Facilities

Taichung Metro station accessibility records.

Taichung Metro station accessibility

Ten named facilities from a dedicated operator page, from tactile warning tiles to a wheelchair waiting zone aligned on the platform — itself confirmed to run to a second page this session's tooling could not reach.

Taichung Metro maintenance depot

A single 20-hectare depot at the Green Line's northern end — beside  Beitun Main Station, not the Wuri/HSR terminus a first pass at this research wrongly assumed — carrying the system's only Level 5 maintenance rating and its own solar-power installation.

Operations

Taichung Metro Green Line ridership and fare-history records.

Taichung Metro ridership

July 2026's daily figures add up to exactly the stated average — a real, internally consistent primary total, even though the table's own column headers were lost to a PDF font-encoding gap.

Taichung Metro fare history

A resident-priced regional season pass with four geographic tiers, a monthly points subsidy layered on top of a senior concession, and — like both other Taiwan metro operators this project has now checked — a base single fare kept off the page entirely.

Projects

Taichung Metro land development mechanism and Green Line station case records.

Taichung Metro land development

Seven Green Line stations, each with a real investor, a site figure and a dated procedural timeline — one already built and sold, one still without an investor at all.

Taichung Metro Corporation's Green Line is a separate railway from the Taipei-region network, even though both are represented by the same TDX rail-data family.^[4] Its public service opened on 25 April 2021 after a test-operation restart, and the current operating line has 18 stations between **G0** Beitun Main Station and **G17** HSR Taichung Station.^[11]^[2] The station records, route sequence and coordinates on this system are the committed TMRT records from Taiwan MOTC's TDX platform.^[1]

The system is medium-capacity, steel-wheel and fully driverless.^[3] **G0** and **G17** are at ground level; the other 16 stations are elevated.^[3] Its route crosses several kinds of urban edge: the Beitun depot and new development at the north end, established neighbourhoods and civic destinations through the middle, and the TRA/HSR interchange at the south.^[2]^[4] That geography is more useful here than calling the line simply "green": each station page keeps its TDX address, district, official sequence and chainage visible.

The construction record is split across four packages. CJ910 covers **G0**, the Beitun depot and the full track system at the northern end; CJ920 covers **G3**–**G9**; CJ930 covers **G10**–**G17**; and CJ900/CJ907 covers the system equipment and rolling stock.^[5]^[6]^[7]^[8] The system's most consequential incident was a joint-shaft fracture during test operation on 21 November 2020, followed by a new-axle verification programme and the 2021 reopening.^[9]^[10]^[11] An older beam-collapse accident at the **G4**/**G5** construction site in 2015 is a separate event with separate casualties, not the later operating incident.^[9]

This system uses TDX for structured station and route data, and the operator, Taichung City government, construction bureau and Control Yuan for history and engineering. The page does not infer a station's structure from its address or from a photograph.

The signalling and automation record `[/rail/tmrt/technology/signalling/]` covers the operator's "fully automatic driverless" claim and the CJ900/CJ907 system-equipment contract behind it — a three-firm consortium and six named subsystems, none of them a branded signalling product any source found names. The rolling-stock record `[/rail/tmrt/rolling-stock/fleet-roster/]` covers the same contract's EMU subsystem: a fleet of two-car trainsets, dimensioned precisely by the operator's own FAQ, with no stated manufacturer split or model/series name. The accessibility record `[/rail/tmrt/facilities/accessibility/]` covers ten named station facilities from a dedicated operator page — itself confirmed to run to a second page this session's tooling could not retrieve. The ridership record `[/rail/tmrt/operations/ridership/]` covers one month's daily figures from the operator's own statistics archive, internally consistent but silent on what exactly is being counted after a PDF font-encoding gap dropped the table's own column headers. The fare history record `[/rail/tmrt/operations/fares/]` covers a resident-priced regional season pass spanning four counties and a monthly points subsidy layered on top of a senior concession — while the base single fare stays off the page entirely, the third Taiwan metro operator this project has found the same gap for. The land development record `[/rail/tmrt/projects/joint-development/]` covers seven named Green Line station sites with real investors and dated timelines — the case list Kaohsiung's and Taoyuan's equivalent pages both went looking for and could not reach.
