

Network comparisons

Lines by length and stations; operators by published line coverage and documented fleet-family pages; stations by structure and the latest imported ridership point.

Lines

The line table keeps the different length measures separate. Official or operator route length is shown beside the guide's measured geometry where both exist; the measured value is not substituted for the published one. Ridership is the latest point imported for that line from an operator dataset, so an empty cell means the checked source does not publish a line total rather than that the line carries no passengers.

Line	Stations	Published km	Measured km	Run min	Latest line ridership
 Wenhua	24	25.17	25.04	45	TBC
 Tamsui-Xinyi	28	28.24	27.44	54	TBC
 Songshan-Xindian	20	18.77	17.96	37	TBC
 Zhonghe-Xinlu	26	24.11	24.05	48	TBC
 Bannan	23	26.65	26.64	48	TBC
 Circular	14	15.06	12.24	34	4,098,230 2026-07
 Sanying	12	14.29	TBC	TBC	1,921,382 2026-07
 Airport MRT	22	51.76	52.56	84	3,976,430 2026-07
 Danhai LRT	14	8.42	7.83	30	1,026,948 2026-07
 Ankeng LRT	9	7.10	5.86	21	341,692 2026-07
 Wuriwenxin Beitun	18	16.93	16.90	71	TBC

Operators

This is an evidence boundary, not an estimate of the companies' complete fleets. "Fleet-family pages" counts the researched rolling-stock records currently in the metro system folder, while line and station counts come from the namespaced station registry. Individual-set allocations, current depot rosters and some light-rail vehicle details remain TBC where the published primary sources do not provide them.

Operator	Lines	Stations	Fleet-family pages	Lines represented
Taipei Rapid Transit Corporation TRTC	5	121	7	Wenhua, Tamsui-Xinyi, Songshan-Xindian, Zhonghe-Xinlu, Bannan
New Taipei Metro Corporation NTMC	2	26	TBC	Circular, Sanying
Taoyuan Metro Corporation TYMC	1	22	TBC	Airport MRT
New Taipei Metro Corporation NTDLRT	1	14	TBC	Danhai LRT
New Taipei Metro Corporation NTALRT	1	9	TBC	Ankeng LRT
Taichung Metro Corporation TMRT	1	18	TBC	Wuriwenxin Beitun

Stations

Station depth is the sourced structure classification in the station overlay, not a visual inference from coordinates. Ridership and rank use each station's latest imported period and rank only within its own line. The table keeps the full record available without JavaScript, and TBC rows remain in place instead of disappearing from a comparison that would otherwise imply complete coverage.
