Taoyuan Metro lines

The Airport MRT operating line and the Green Line construction registry.

Lines in this system

The Taoyuan Metro system page has one current TDX operating line, the Airport MRT, and one project registry for the under-construction Green Line. The Green Line is kept in the TYMC namespace because its code and station table are published by Taoyuan's engineering bureau, while a live TDX TYMC check returned only the Airport MRT line record.^[1] ^[2]

Project line boundary

The Green Line project page records 21 stations, 27.8 kilometres, 10 underground stations and 11 elevated stations, with branches toward Airport MRT **A11** and **A16**.^[1] Its approvals and package milestones are described on the line page and remain distinct from the Airport MRT's operating data.^[1]

Source boundary

Read the line page for the construction sequence, target opening and TBC fields; the station registry is a project record, not a timetable.^[1] ^[2]

Live probe retrieved on 2026-08-24: the TYMC Line endpoint returned one A record and no G record; the project registry therefore remains primary-research rather than TDX-backed.
