

Kaohsiung Metro station accessibility

The operator states every station has an accessible elevator — but not as a measured percentage, and not under any named regulation this page could find.

KAOHSIUNG METRO STATION ACCESSIBILITY			
ACCESSIBLE ELEVATOR PROVISION	ACCESSIBLE RESTROOMS	ACCESSIBLE PARKING	NAMED REGULATORY BASIS
stated as universal ("all stations"), not a measured completion percentage ^[1]	in both men's and women's facilities at every station ^[1]	one car/motorcycle space at stations with park-and-ride facilities ^[1]	TBC

What the operator states, and what it doesn't

KRTC's own accessibility page states that every station provides an accessible elevator, framed to serve visually impaired, physically disabled, elderly and other temporarily mobility-limited passengers — those carrying heavy items or pushing strollers are named explicitly alongside disabled passengers.^[1] This is a statement of universal provision in words, not a measured completion percentage: no "100% of stations" figure, or any numeric count, appears anywhere on the page.

The same page enumerates a defined set of facilities at every station: an accessible ticket gate and an accessible add-value/ticketing machine positioned near the non-paid-area elevator exit; accessible restrooms in both men's and women's facilities; accessible ramps that continue existing street-level infrastructure into the station as a connection point for wheelchair users; one accessible car or motorcycle parking space at stations that have park-and-ride facilities; and platform-level tactile guidance, accessible door-position signage, and audible door-closing warnings.^[1]

Checked specifically: the same page cites no named law, regulation or design standard anywhere in its content — not Taiwan's general building accessibility code, not the public-transport accessible-facilities regulation, not the disability-rights protection act. This is recorded as not found on this page, not as confirmed absent from KRTC's practice more broadly; a KRTC internal policy document or tender specification might state one that this page did not reach.

The light rail is a separate question

KRTC's accessibility page sits within the site's heavy-rail ("乘車指南") section. The separate Circular Light Rail `[/rail/krtc/lines/circular-light-rail/]` station-guide pages checked for this page did not themselves mention accessibility, low-floor vehicles or wheelchair access. Whether the heavy-rail page's "all stations" statement is meant to cover the light rail too, or refers only to the Red and Orange Lines, is not stated by any source found and is not assumed either way here.

Remaining gaps

No numeric elevator-completion figure and no named regulatory basis for KRTC's accessibility programme were found in any source read for this page. Whether the Circular Light Rail is covered by the same "all stations" statement is TBC.
