Near this station

Nearby connections are committed build-time joins. Bus links use curated exact-stop matches; YouBike links use the nearest-coordinate match within 200 metres, so a dock is nearby rather than an assertion that it sits inside the station.

Station context

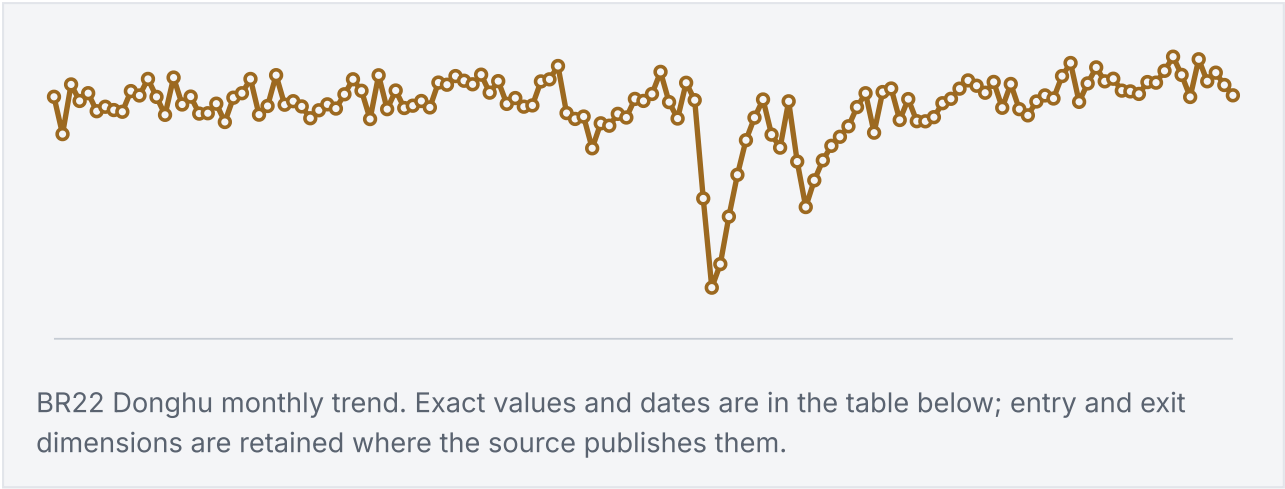

The current DORTS project table maps Donghu to engineering station B9, and the CB424 record includes B9 in the four-station elevated package covering B6–B9.^[1] B9 is on 25-metre Kangning Road 3, near Lane 245, on transport land to the northeast.^[2] The technical record describes a northeast–southwest elevated side platform, a 93-metre station body 20.6 metres wide and an 83-metre platform.^[2] DORTS treats B9 as part of the commercial-and-recreation corridor along Chenggong and Kangning Roads, where the broader account also records Dahu Park’s recreational role and nearby infrastructure.^[3] B9’s theme is Music, with a blue-grey station colour and a design reference to the Keelung River and sky.^[4] The shared elevated-station design keeps circulation semi-open and uses glass, enamelled steel and natural ventilation to reduce the visual and structural heaviness of a station above the road.^[5] B9 is among the side-platform stations for which DORTS documented rainwater falling from the platform edge onto metal cladding and prescribed flashing and maintenance procedures.^[6] Lake Ripples at Exit 3 turns the wall into DORTS’s “lake city story”: wind and rain create overlapping ripples that stand for shared memory in a city with lakes.^[9] The official art table records the work in March 2009 on the exterior wall at Exit 3, by Wu Shui-yi and Yang De-yi, using ceramic with celadon glaze through open selection at a listed cost of NT\$2,300,000.^[9] The public-art chapter’s executed list also records Donghu as an open-selection station,

separate from the topic summary used to frame the line's design themes.^[8] The station-colour plan separates the brown line colour used in platform-door and sign systems from each station's own colour treatment across selected finishes.^[7] The fetched CB424 record identifies the station package and dimensions but does not publish an individual contractor, award date or final station-package value; those fields remain TBC.^[2]

Ridership

Monthly station movement is entry plus exit. The latest published month is **07/2026**: **483,656** movements, ranked **#13 of 24** stations on the BR Line.

車站無障礙設施查詢

PRIMARY Taipei Rapid Transit Corporation (臺北大眾捷運股份有限公司) accessed 2026-08-24

TRTC's stationdisabledinfo API was fetched for all 121 station records returned by its station-label endpoint. The API publishes station-specific lift/ramp locations, accessible-toilet locations, tactile-paving and stair anti-slip fields. It does not publish nursing-room or platform-gap fields; those remain TBC here.
