Dàyou Bus / CitiAir Bus — New Taipei TDX record

The TDX record for 大有巴士 has no New Taipei route association; the operator's own pages describe its separately registered Taipei and intercity work, fleet and management sites.

DÀYOU BUS / CITIAIR BUS – NEW TAIPEI TDX RECORD			
ENGLISH NAME Dàyou Bus / CitiAir Bus ^[2]	CHINESE NAME 大有巴士 ^[1]	TDX OPERATOR RECORD ID bus-operator-16474-f0kszl ^[1]	TDX OPERATOR NUMBER TBC ^[1]
TDX SOURCE MUNICIPALITY NewTaipei ^[1]	ROUTES IN THIS TDX RECORD 0 ^[1]	PUBLISHED SERVICE PHONE 02-8663-9000; 0800-088-626 ^[2]	FOUNDED 24 March 1969 (ROC year 58) ^[2]

What this record is — and is not

The committed TDX pull identifies `bus-operator-16474-f0kszl` as 大有巴士, assigns it to NewTaipei, and gives it zero associated route records^[1]. That is a real data-layer record, but it is not evidence that the legal company operates no buses anywhere^[1]. A separate Taipei TDX operator record uses the same Chinese name, so the two records are kept distinct rather than silently combined^[1].

The operator's own company page uses “CitiAir Bus Co.” in English and says that the company was founded on 24 March 1969, before Taipei's bus network entered joint operation `[/bus/network/joint-operation/]`^[2]. Its historical account places the early service area around Nangang `[/rail/metro/stations/bl22/]`, Songshan `[/rail/metro/stations/g19/]` and the part of Xinyi that developed from Songshan^[2]. The same page says the current operating headquarters is in Wenshan and that management stations are maintained in Xinzhuang `[/rail/metro/stations/o18/]` and Nangang^[2]. Those are published operating sites, not a complete depot register: the page gives no opening dates, capacities, route allocation or ownership of the sites^[2].

The fetched primary pages do not establish a parent group, shareholder control structure, merger chronology or route-contract history for Dàyou^[2]^[1]. The current company page describes a “new team” and modern management, but it does not name a holding company or identify a legal merger^[2].

Fleet and services

The operator's fleet page divides the displayed vehicles into highway passenger and city passenger groups ^[3]. It lists King Long `[/bus/models/king-long/]` highway vehicles from 2019 and Volvo vehicles from 2023 for airport-bus work ^[3]. For city service it lists Taiwan Yutong vehicles from 2016 and 2017, AEBUS vehicles from 2020, and King Long vehicles from 2020 and 2024 ^[3]. The page does not give chassis codes, body builders beyond the displayed brands, seating/standing capacity, fleet totals, or an electric-versus-hybrid split, so those fields remain TBC ^[3].

Taipei's Public Transportation Office recorded a dated accessibility deployment on 23 December 2016: Dàyou and San Chung Bus put 37 low-floor buses into service across the named joint-operation route group ^[4]. The notice says the vehicles carried wheelchair spaces, restraint belts, emergency intercoms, stop announcements and passenger-information displays ^[4]. It is evidence of a 2016 low-floor deployment, not a current fleet count or proof that every vehicle on the separate TDX record has the same equipment ^[4].

The company's published airport-service page describes Route 1961 as running between central Taipei, Nankan and Taoyuan Airport, with direct and commuter variants, a 90–120 minute stated travel range, fare bands by segment and an accessible-vehicle note ^[7]. That page is an operator service page and is not used to hand-list routes for the zero-association New Taipei record; the route section above deliberately remains generated from TDX and therefore contains no route ^{[1] [7]}.

Regulatory record

The Highway Bureau's full operator record places Dàyou under the Taipei Motor Vehicles Office for highway passenger transport and displays a 乙 evaluation for ROC year 112 ^[5]. Its accident table records dated collisions and fires, including a 2025-05-27 rear-end collision with one injury, a 2024-01-10 vehicle fire with no casualties and a 2023-05-02 rear-end collision with one injury ^[5]. Earlier rows include a 2013 Taipei bus-lane collision with eight injuries and two fire incidents on national highways ^[5]. These entries are retained as the regulator's displayed highway record; they are not generalized into a city-bus safety rate ^[5]. The same agency's directory lists the company in Banqiao with telephone 02-8663-9000, while the operator page publishes the Wenshan office and the 0800 hotline ^{[6] [2]}.

The mismatch is therefore part of the record's subject, not a hole to fill with invented service: TDX's New Taipei operator row has no bus route, while the company and responsible authorities document a wider Dàyou/CitiAir operating history ^{[1] [2]}.

Specifications

Published operating sites	Wenshan operating headquarters; Xinzhuang and Nangang management stations [2]
Published vehicle brands and years	King Long 2019; Volvo 2023; Yutong Taiwan 2016–2017; AEBUS 2020; King Long 2020 and 2024 [3]
2016 low-floor deployment	Part of 37 low-floor buses introduced by Dàyou and San Chung Bus on 23 December 2016 [4]
Highway Bureau evaluation	Z (112) for highway passenger transport [5]
Ownership, parent group and merger chronology	TBC
Depot capacities, opening dates and route allocation	TBC
Chassis, body, passenger capacity and propulsion split	TBC
Current contract awards and terms	TBC
