Green Line

Taichung's 18-station driverless railway from Beitun Main Station to HSR Taichung Station.

THE LINE

NOT ESTABLISHED

16.71^[3] km

OPERATOR-PUBLISHED ROUTE LENGTH

TDX publishes RouteLength 16.70 km, plus 16.93 km in direction 0 and 16.97 km in direction 1 as cumulative station chainage; these values are retained as a conflict rather than silently substituted for the operator's 16.71 km figure.

G WURIWENXIN BEITUN LINE 烏日文心北屯線

OPERATOR Taichung Metro Corporation [/rail/1/operators/tmrt/] [10]	STATIONS 18 [3]	TERMINI G0 Beitun Main Station [/rail/tmrt/stations/g0/] — G17 HSR Taichung Station [/rail/tmrt/stations/g17/] [2]	PUBLIC OPENING 25 April 2021 [12]
GUIDEWAY 16 elevated stations; G0 and G17 at ground level [4]	AUTOMATION Fully driverless [4]		

The Green Line is a single line, but it is not a single measurement. The operator's 2021 route report gives **16.71 km** and 18 stations. [3] The committed TDX route record gives **16.70 km** in its `RouteLength` field, while its station chainages reach **16.93 km** in direction 0 and **16.97 km** in direction 1. [1] Those four figures are published together here because the sources do not state that they measure exactly the same object; the page does not average them.

G0 Beitun Main Station [/rail/tmrt/stations/g0/] and **G17** HSR Taichung Station [/rail/tmrt/stations/g17/] are the line's two ground-level stations; the other 16 are elevated. [4] The operator describes the railway as steel-wheel and medium-capacity, with two-car, fully driverless trains and a maximum operating speed of 75 km/h. [4] The TDX sequence runs through Beitun, North District, Xitun, Nantun [/rail/tmrt/stations/g11/], South District and Wuri [/rail/tmrt/stations/g16/], ending beside the HSR and TRA interchange at **G17**. [1] [2]

The civil work is readable as three geographic packages: CJ910 at **G0** and the Beitun depot, CJ920 across **G3** – **G9**, and CJ930 from **G10** through **G17**. [5] [6] [7] CJ900/CJ907 is the system-equipment package, covering power, communications, automatic fare collection, depot equipment, trains and related systems rather than a further passenger-facing segment. [8]

The line's opening history contains a material safety event. A joint shaft fractured during test operation on 21 November 2020; the Control Yuan records failures to verify design parameters and deficiencies in quality supervision. [10] [11] Taichung restarted test operation on 25 March 2021 and began formal service on 25 April 2021 after the remedial programme. [12] The sources read for this page do not support the often-repeated "2022 reopening" date, so it is recorded as a checked conflict rather than repeated as fact.

Public art is not treated as a colour swatch for the line. The operator's current roster names works at **G0**, **G3**, **G7**, **G9**, **G10a**, **G13**, **G16** and **G17**, with the station-specific pages below preserving those names and artists. [9]

The line as surveyed, from MOTC route geometry — 16.9 km measured along the alignment from the first station to the last. Termini and interchanges are labelled; every station has a name on hover.

Specifications

Operator route length	16.71 km ^[3]
TDX direction 0 chainage	16.93 km ^[1]
TDX route length field	16.70 km ^[1]
TDX direction 1 chainage	16.97 km ^[1]
Stations	18 ^[3]
Train formation	2 cars ^[4]
