
Taipei Transit Guide

An English-language reference for public transport in Taipei — metro lines, rolling stock, depots and bus routes.

Rail

Metro, light rail, conventional rail and high speed rail around Taipei — the lines, the trains that run them, the depots that keep them running, and the history that shaped all three.

Lines	10 pages
Route overviews, station lists, operating hours and service patterns.	
Rolling Stock	7 pages
Train fleets — builders, technical specifications, formations and where each type runs.	
Depots	8 pages
Stabling and maintenance facilities — location, capacity, and the lines and fleets they serve.	
History	1 page
How the railway came to be the way it is — the contracts, disputes and decisions whose consequences are still running.	
Systems	0 pages
The technology layer — signalling, power, guideway and automation — and why Taipei runs several of each.	
Operators	3 pages
Who actually runs what — TRTC, New Taipei Metro, Taoyuan Metro, and eventually TRA and THSR.	

Bus

Taipei City and New Taipei bus network — routes, operators and garages. Not yet written.

Network

0 pages

The joint-operation system — one brand, one fare structure, many private companies — and the route numbering that encodes more than it appears to.

Routes

0 pages

Individual bus routes — operator, corridor, stop list and frequency. Planned for v2.

Operators

0 pages

Bus companies working the Taipei network, their fleets and depots. Planned for v2.

Models

0 pages

Vehicle types across the operators — low-floor, hybrid and electric adoption, and who bought what when.

Garages

0 pages

Where the buses sleep — operator garages and depots across Taipei and New Taipei.

Bike

YouBike — the shared bicycle system that is genuinely part of the transit network, with a generational story nobody has told properly in English.

History

0 pages

From the Xinyi pilot to the retirement of the first generation — the timeline, dated from primary announcements.

Generations

0 pages

1.0, 2.0 and 2.0E — incompatible by design, and the engineering reasons why.

Stations

0 pages

The dock network, from the same government open-data platform that feeds the rail pages.

Gondola

The Maokong Gondola — run by the metro's own recreation subsidiary, and the network's only cable transit.

Ferry

The Blue Highway — small, real, inside the fare system, and absent from almost every English account of Taipei transit.

Ticketing

Cards, passes and fares — the layer every rider touches and English sources routinely get wrong.

An independent, non-commercial reference site. Not affiliated with Taipei Rapid Transit Corporation, Taipei City Government, or any bus operator. Line colours are the official values published by each operator through Taiwan MOTC's open data platform. [About this site.](#)

Station names, codes and sequence from TDX Transport Data eXchange, Ministry of Transportation and Communications, operator TRTC. Government open data. Retrieved 2026-08-05; source last updated 2020-01-31. Provenance.
