Kaohsiung YouBike station index

Searchable static YouBike station rows for Kaohsiung, grouped by district with coordinate-verified rail joins.

KAHRSIUNG YOUNBIKE STATION INDEX			
MUNICIPALITY Kaohsiung ^[1]	STATIC STATION ROWS 1500 ^[1]	PUBLISHED DOCK CAPACITY TOTAL 30382 ^[1]	CONFIRMED COORDINATE JOINS 0 ^[2]

This is the Kaohsiung browse index for the static TDX Bike Station/City snapshot retrieved on 25 August 2026 ^[1]. It contains 1500 station rows and a published capacity total of 30382 docks ^[1]. Live available-bike and available-return-dock values are excluded because they belong to a separate availability feed ^[1].

The MRT/LRT column is present only when the station has one unique nearest TDX rail station within 200 metres by coordinates ^[2]. The join does not compare names, and an ambiguous or more distant result is left blank ^[2].

District indexes

DISTRICT	STATIONS	PUBLISHED CAPACITY	COORDINATE JOINS
Unclassified [/bike/stations/kaohsiung-unclassified/] ^[1]	1500	30382	0

Each district link is a browse page rather than an individual station page: a dock is a data row here, not a thin standalone article ^[1].

Snapshot detail

The Kaohsiung municipality section is a build-time view of 1500 returned TDX Station/City records, not a live occupancy display ^[1]. The normalized rows retain 1500 English station names, 1500 Traditional Chinese station names, and 1500 valid coordinate pairs; the source response also supplies station identifiers, addresses, service type, capacity and source-update timestamps ^[1].

The published capacity values in this group range from 10 to 99 docks per row, with the total shown above calculated by summing the returned BikesCapacity fields ^[1]. The observed ServiceType distribution is 2: 1500, so a missing or null service value is not converted into an assumed operating category ^[1].

The TDX records used for this page carried UpdateTime value(s) 2026-08-25T23:38:06+08:00 ^[1]. Those timestamps date the source response, while the page frontmatter records the retrieval date; neither timestamp is presented as a prediction of future station availability ^[1].

Representative rows in this group are station ID 501216070 (17 docks; YouBike2.0_阿公店柳橋西路口), station ID 501228004 (16 docks; YouBike2.0_阿公店森林公園) and station ID 501228003 (39 docks; YouBike2.0_阿公店水庫停車場) ^[1]. They remain rows in a browse index because the source provides a compact identity, address, coordinate and capacity record; creating a separate article for every dock would repeat the same source fields without adding a sourced history or design record ^[1].

The nearby-rail column is conservative: 0 rows have a confirmed coordinate join in this group ^[2]. A match is retained only when one nearest candidate is within 200 metres and not tied at the one-metre ambiguity threshold, and the calculation compares coordinates rather than station names ^[2]. Current available bikes and return docks are deliberately outside this static page because TDX publishes those values through a separate availability feed ^[1].

Specifications

Live availability

TBC

2 of 2 sources on this page are primary — published by the operator, the builder or government.

- 1 TDX Bike Station City pull [<https://tdx.transportdata.tw/api/basic/v2/Bike/Station/City/{City}>]
交通部運輸資料流通服務平臺 — Bike Station/City
PRIMARY Ministry of Transportation and Communications TDX / 交通部運輸資料流通服務平臺
accessed 2026-08-25
Supports the static station rows, bilingual names and addresses, coordinates, capacity and the city snapshot counts. It does not support live bike or dock availability.
- 2 TDX rail station registry [<https://tdx.transportdata.tw/>]
交通部運輸資料流通服務平臺 — Rail Station
PRIMARY Ministry of Transportation and Communications TDX / 交通部運輸資料流通服務平臺
accessed 2026-08-15
Supports the rail station coordinates, codes and bilingual names used for the nearest-coordinate join; the join does not compare station names.
