

Bus depots and operating sites

Sourced bus stations, dispatch sites and charging-depot procurements, with capacity and opening gaps left visible.

TDX has no depot or garage field, so these are published only where an operator or government document names a site ^[1].

- Danan Guandu charging depot [\[/bus/depots/guandu-danan/\]](/bus/depots/guandu-danan/) — a Danan procurement specification for 74 parking spaces and charging classes; completion is not verified.
- San Chung Bus operating sites [\[/bus/depots/sanchung-operating-sites/\]](/bus/depots/sanchung-operating-sites/) — 16 dispatch sites and two maintenance yards named by the operator; individual capacities and opening dates are TBC.
- Taipei Bus stations and facilities [\[/bus/depots/taipei-bus-stations/\]](/bus/depots/taipei-bus-stations/) — the operator's station page publishes addresses and route allocations, while capacity and opening dates remain TBC.
- Depot electrification and charging infrastructure [\[/bus/depots/charging-infrastructure/\]](/bus/depots/charging-infrastructure/) — no national depot-charger registry exists, but named installations show buses sharing an MRT depot's power draw by night, rationed charging bays, and a public-EV-charger boom that mostly isn't measured against buses at all.

A route association is not a depot allocation. Where a source publishes a station list but not route-by-site assignments, this index keeps that distinction rather than guessing from endpoints ^[1].

4 entries

	Danan Guandu charging depot Danan Bus's Guandu electric-bus charging procurement record.
	Depot electrification and charging infrastructure No consolidated national depot-charger registry exists — but named installations show buses sharing MRT depots at night, rationed charging bays, and a public-EV-charger boom that mostly isn't about buses at all.
	San Chung Bus operating sites San Chung Bus's published dispatch-site and maintenance-yard network.
	Taipei Bus stations and facilities Taipei Bus's published station, depot and repair-facility directory.

Side by side

	Danan Guandu charging depot	Depot electrification and charging infrastructure
Current completion status	TBC	—
Route allocation	TBC	—
Opening date	TBC	—
Dedicated depot-electrification budget line	—	TBC — not found in the 2030 programme's four published bud
National bus-specific vehicle-to-charger ratio	—	TBC
Nangang depot (Capital Bus) charging posts	—	8
Nangang depot charging guns	—	16
Charger cost, large electric bus	—	~NT\$3 million per unit
Individual site capacities	—	—
Opening dates	—	—
Route allocation by site	—	—

	Danan Guandu charging depot	Depot electrification and charging infrastructure
Site capacity	—	—
