 NOT ESTABLISHED

 RED LINE 紅線			
TDX LINE ID R ^[1]	ORDERED TDX STATIONS 25 ^[2]	TDX ROUTE LENGTH 29.72 ^[3]	GOVERNMENT PROJECT LENGTH 28.3 ^[9]
TRADITIONAL CHINESE NAME 紅線 ^[1]	ORIGINAL RED LINE SERVICE 2008-03-09 ^[12]	 R24 SERVICE OPENING 2012-12-23 ^[15]	

Red Line in the current data

TDX identifies this route as the Red Line with line ID R; the line record supplies the Traditional Chinese name 紅線.^[1] The operator's English guide map uses the same line identity and lists the same station-code family from  R3 to RK1.^[7] This page keeps the line record, route record and station-of-route record separate because they answer different questions.^{[1] [3] [2]}

The direction-zero StationOfRoute record contains 25 ordered members.^[2] The reverse-direction record is also present in the raw pull, but this page uses direction zero as the reader-facing sequence so that the order is stable and explicit.^[2] The sequence is a data relationship; it

does not claim that every train service stops identically at every time of day. ^[2] ^[6]

Construction and opening chronology

The government's network history places the Red and Orange lines in the first stage of Kaohsiung's first-period MRT development plan, approved in ROC80, and says that the two routes were completed and opened in ROC97. ^[11] KRTC's company history gives a more granular institutional chronology: the city invited private participation on 1 February 1999, the China Steel-led application was selected on 10 May 2000, the company received its licence on 28 December 2000, and the construction and development agreements were signed on 12 January 2001. ^[10] KRTC records construction beginning in October 2001 and describes the concession as 36 years from the start of construction, comprising more than six years of construction before the Red and Orange lines entered service. ^[10]

MTBU treats the Red and Orange network as one private-participation construction and operating project: its page gives six years of construction, 30 years of operation and a 36-year concession, with a planned 42.7 km and 38 stations, three depots and a total construction cost of NT\$183.963 billion. ^[9] KRTC records the Red Line's regular service opening on 9 March 2008 and the Orange Line's opening on 14 September 2008; the latter date marks the full operation of the original cross-shaped network, not the first Red Line service. ^[12]

The historical service-indicator document is a separate design snapshot. It describes a Red Line of 28.3 km, with 19.8 km underground and 8.5 km elevated, and 23 stations at the time of that document. ^[16] The current government page reports 28.3 km and 24 Red Line stations, while the TDX route pull reports 29.72 km and its current sequence includes **R24** and RK1. ^[9] ^[3] ^[2] Those values are retained as different dated or structured boundaries rather than made to agree by arithmetic.

Extensions, interfaces and depots

R24 was not part of the original 2008 station opening. ^[12] ^[15] MTBU's delivery study says the station contract began on 3 January 2011, that overall progress reached 79.55% by the end of June 2012, and that the project had initially fallen behind because approval timing was later than expected and KRTC had declined to invest in the electrical and mechanical works on financial-difficulty grounds. ^[14] The same study describes the response as a contract change with more finely divided milestone payments and records the target of substantive completion and system integration by the end of 2012. ^[14] The government's 109-year statistical report records **R24**'s opening on 23 December 2012. ^[15]

R11 Kaohsiung Main Station was a second interface with another major project. The temporary co-constructed station opened with the Red Line in ROC97, while the permanent station had to follow the city railway-undergrounding programme; MTBU records the switch from the temporary station to the permanent station's initial operating area on 5 September 2018. ^[13] This is why a Red Line opening date alone does not describe every station's final architectural or systems completion.

The first Gangshan–Lujhu extension phase added RK1 north of **R24**.^[2]^[19] MTBU records free trial operation from noon on 30 June 2024, a connection to TRA Gangshan Station and planned joint development around the new interchange.^[19] The free trial ended and formal operation and charging began on 1 September 2024.^[20] The current second phase is split into 2A and 2B; the government reports RK2–RK6 Phase 2A at 33.59% on 20 May 2026 and identifies relocation of a 2,000 mm water main under Provincial Highway 1 as a major construction constraint.^[23]

The joint project planned two Red Line depots and one Orange Line depot, a distinction also recorded in the statistical report.^[15] KRTC places the South Depot at the Red Line's southern end around **R4A**, with a 26-hectare site, a Level 3 maintenance function and the network control centre.^[17] It places the North Depot at the Red Line's northern end across Gangshan and Ciaotou districts.^[18]

Systems evidence and boundary

The historical service-indicator document lists rolling stock, signalling, DC traction power, AC power, platforms, communications, automatic fare collection, lifts, escalators and depot equipment as the integrated system components.^[16] The checked modern system record is more specific for the RK1 extension than for the original line: MTBU describes train, power, signalling, communications, fare collection and platform-door testing, including the interlock between the doors and signalling.^[21] Its power notice records RK1 traction supply extended from BSS5 through the North Depot, with a 22 kV feeder and 380/220 V station supply.^[22] These extension records establish the interface and power arrangement for the new section, but they do not establish the original Red Line signalling supplier, generation, headways, full-line platform-door retrofit history or per-station accessibility inventory; those remain TBC.

Ordered stations

- Siaogang (**R3**) [/rail/krtc/stations/siaogang-r3]: sequence 1, TDX distance 0 km.^[2]
- Kaohsiung International Airport (**R4**) [/rail/krtc/stations/kaohsiung-international-airport-r4]: sequence 2, TDX distance 1.49 km.^[2]
- Caoya (**R4A**) [/rail/krtc/stations/caoya-r4a]: sequence 3, TDX distance 3.32 km.^[2]
- Cianjhen Senior High School (**R5**) [/rail/krtc/stations/cianjhen-senior-high-school-r5]: sequence 4, TDX distance 4.46 km.^[2]
- Kaisyuan (**R6**) [/rail/krtc/stations/kaisyuan-r6]: sequence 5, TDX distance 5.61 km.^[2]
- Shihjia (**R7**) [/rail/krtc/stations/shihjia-r7]: sequence 6, TDX distance 6.86 km.^[2]
- Sanduo Shopping District (**R8**) [/rail/krtc/stations/sanduo-shopping-district-r8]: sequence 7, TDX distance 7.82 km.^[2]
- Central Park (**R9**) [/rail/krtc/stations/central-park-r9]: sequence 8, TDX distance 9.1 km.^[2]
- Formosa Boulevard (**R10**) [/rail/krtc/stations/formosa-boulevard-r10]: sequence 9, TDX distance 9.84 km.^[2]
- Kaohsiung Main Station (**R11**) [/rail/krtc/stations/kaohsiung-main-station-r11]: sequence 10, TDX distance 10.72 km.^[2]

- Houyi (**R12**) [/rail/krtc/stations/houyi-r12]: sequence 11, TDX distance 11.73 km. ^[2]
- Aozihdi (**R13**) [/rail/krtc/stations/aozihdi-r13]: sequence 12, TDX distance 12.69 km. ^[2]
- Kaohsiung Arena (**R14**) [/rail/krtc/stations/kaohsiung-arena-r14]: sequence 13, TDX distance 13.68 km. ^[2]
- Ecological District (**R15**) [/rail/krtc/stations/ecological-district-r15]: sequence 14, TDX distance 14.93 km. ^[2]
- Zuoying (**R16**) [/rail/krtc/stations/zuoying-r16]: sequence 15, TDX distance 16.52 km. ^[2]
- World Game (**R17**) [/rail/krtc/stations/world-game-r17]: sequence 16, TDX distance 18.19 km. ^[2]
- Oil Refinery Elementary School (**R18**) [/rail/krtc/stations/oil-refinery-elementary-school-r18]: sequence 17, TDX distance 18.97 km. ^[2]
- Nanzih Technology Industrial Park (**R19**) [/rail/krtc/stations/nanzih-technology-industrial-park-r19]: sequence 18, TDX distance 20.27 km. ^[2]
- Houjing (**R20**) [/rail/krtc/stations/houjing-r20]: sequence 19, TDX distance 21.28 km. ^[2]
- Metropolitan Park (**R21**) [/rail/krtc/stations/metropolitan-park-r21]: sequence 20, TDX distance 22.36 km. ^[2]
- Cingpu (**R22**) [/rail/krtc/stations/cingpu-r22]: sequence 21, TDX distance 24.04 km. ^[2]
- Ciaotou Sugar Refinery (**R22A**) [/rail/krtc/stations/ciaotou-sugar-refinery-r22a]: sequence 22, TDX distance 25.14 km. ^[2]
- Ciaotou Station (**R23**) [/rail/krtc/stations/ciaotou-station-r23]: sequence 23, TDX distance 26 km. ^[2]
- Kaohsiung Medical University Gangshan Hospital (**R24**) [/rail/krtc/stations/kaohsiung-medical-university-gangshan-hospital-r24]: sequence 24, TDX distance 28.81 km. ^[2]
- Gangshan Station (RK1) [/rail/krtc/stations/gangshan-station-rk1]: sequence 25, TDX distance 29.72 km. ^[2]

The TDX route record gives 29.72 km for this direction-zero route, while the Kaohsiung City Government project page gives 28.3 km for the Red Line. ^{[3] [9]} Both values are published because the sources may measure different route definitions; this site does not average them, choose the newest value or relabel one as an error without a source that explains the difference. ^{[3] [9]} The government page describes the joint Red/Orange project as underground and elevated metro infrastructure and names the relevant station and transfer structure. ^[9]

Transfers and service boundary

The TDX LineTransfer response identifies the Formosa Boulevard transfer relationship between **R10** and **05**, while the government page lists **R10**, **R11**, **R13**, **R16** and **R23** among the Red Line's transfer stations. ^{[5] [9]} The operator and government pages also identify LRT relationships around **R6** and **R13**. ^{[9] [7]}

The committed FirstLastTimetable pull contains station-direction rows for this operator, but several time fields are blank and the dataset has service-day and destination dimensions. ^[6] Detailed first/last trains, headways by time of day, actual versus design capacity, signalling generation, power, depot allocation, platform screen doors, accessibility facilities and current station ridership remain TBC until their primary records are transcribed and checked. ^{[6] [8]}

What the current page does not claim

The TDX shape is geometry rather than an engineering history; station depth is not inferred from a coordinate, and a route length is not treated as a universal measurement. ^[4] ^[3] The government project page, operator map and TDX records are all retained as distinct evidence layers so future construction, fleet and operations research can attach to the correct source. ^[9] ^[7] ^[4]

Ridership

TBC. No ridership series has been imported for this operator. The page keeps the figure TBC rather than borrowing another operator's data.
