

Depots

Stabling and maintenance facilities — location, capacity, and the lines and fleets they serve.

10 entries

Muzha Depot

The original 6.2-hectare Wenhua facility — now the line's secondary depot, with 12 stabling roads, capacity for 84 married pairs and heavy-maintenance equipment for the 102-car Matra fleet.

Xinzhuang Depot

The Zhonghe–Xinlu Line's level-three secondary depot — redesigned and reduced around preservation of the historic Losheng Sanatorium.

Tucheng Depot

The Bannan Line's level-four main depot — a 26.8-hectare maintenance complex built on former Dahan River flood-control land.

Nangang Depot

The Bannan Line's level-three secondary depot — a narrow eastern facility rebuilt for flood resistance after Typhoon Nari inundated its tracks.

Zhonghe Depot

The Zhonghe–Xinlu Line's tiny secondary depot, built on the former TRA Zhonghe station site and limited by its 1.2–1.47 hectare footprint.

Circular Line South Depot

The Circular Line's main depot at Shisizhang, with a 14.33-hectare site and a smaller depot-layout boundary in official planning records.
