

Taichung Metro Purple Line

Taichung's feasibility-stage Tun District Loop project, planned as a 16-station elevated medium-capacity route linking Dali, Taiping, Beitun and Daqing.

Taichung Metro Purple Line			
Project Status Feasibility study under central review^[1]	Preliminary Length 16.31 km; approximately 16.3 km in July 2026 release^[1]	Planned Stations 16^[1]	Guideway Elevated^[1]
Planned Mode Medium-capacity metro^[3]	Route Role Daqing–Dali–Taiping–Beitun–Green Line extension G1 loop connection^[1]	Latest Review Event Railway Bureau comments, 27 July 2026; report revision before resubmission^[1]	

Purpose and alignment

The Taichung Metro Purple Line is a feasibility-stage project for the city's eastern Tun District. The Taichung [\[/rail/thsr/stations/taichung/\]](/rail/thsr/stations/taichung/) Rapid Transit Systems Bureau frames it as a response to population, industrial and travel growth in Dali, Wufeng and Taiping, with goals that include commuting, school travel, tourism, economic activity and more balanced development.^[1]

Its preliminary route begins at the Green Line's Daqing [\[/rail/tmrt/stations/g13/\]](/rail/tmrt/stations/g13/) Station, runs through Dali and Taiping, then turns north toward Beitun and Green Line extension G1 to form a loop.^[1] The January 2026 release adds the intended interchange pattern: G1 at the north, the Blue Line [\[/rail/metro/lines/bannan-line/\]](/rail/metro/lines/bannan-line/) Taiping extension in Taiping, Orange Line near Defang South Road, and TRA plus the Green Line at Daqing.^[2] These are planned network relationships, not operating transfers.^[1] ^[2]

Published scope and conflicts

The current project page gives a preliminary length of approximately 16.31 km, 16 stations and an elevated form.^[1] The July 2026 release describes the same preliminary project as approximately 16.3 km, with 16 elevated stations and a medium-capacity metro system.^[3] Both values are retained because the sources do not explain whether the 0.01 km difference is rounding or a small planning revision.^{[1] [3]}

The July release gives a total estimated cost of NT\$690.87 billion, with estimated central support of NT\$292.04 billion and a local share of NT\$398.83 billion.^[3] These are estimates attached to a feasibility-stage project, not a construction contract value or a final approved funding split.^[3]

Feasibility review

The project's public chronology starts with local explanation meetings in October 2021 and an initial submission to the Transport Ministry on 20 June 2022.^[1] Written comments followed in September 2022, a revised report in May 2023 and further ministry comments in May 2023.^[1] On 26 March 2024, the city split the prior combined Tun District feasibility work into the Purple Line and the Blue Line Taiping extension, then submitted both projects together.^[1]

The Railway Bureau held a site inspection in May 2024 and an initial review in June.^[1] The city submitted revised reports in January 2025, July 2025 and January 2026 after further central comments.^[1] The January release says the city had completed a revision after the October 2025 comments and resubmitted it for central review.^[2] The July release likewise describes the study as resubmitted in January and under central review.^[3]

The current project page records another Railway Bureau response on 27 July 2026 and says the city is now revising the report before resubmission.^[1] The whole-network page correspondingly places Purple in the medium-term feasibility-study group, alongside the Blue Line Taiping extension, rather than presenting it as an approved construction programme.^[4] The status is therefore current central review with another revision in progress, not a construction start.^{[1] [4]}

Station data boundary

The live TMRT `[/rail/operators/tmrt/]` TDX response checked for this release contains current Green Line records, not a Purple Line project or operating dataset.^[5] The official Purple Line pages give an aggregate count of 16 stations and the elevated guideway form, but do not provide a complete bilingual station-name list, coordinates, exits, accessibility facilities, operating timetable or ridership record.^{[1] [2] [3]} This page records the feasibility project without manufacturing 16 station stubs from a preliminary route.^[1]

There is no published opening date or construction progress percentage in the primary pages read for this unit.^[1]^[4] Those values remain TBC until the feasibility study is approved and later design, procurement or operating records establish them.
