

Rolling Stock

Train fleets — builders, technical specifications, formations and where each type runs.

8 entries

Taipei-region metro fleet roster

An evidence-weighted roster of Taipei and New Taipei metro vehicle families, procurement lots, partial identifiers and known renewal work.

VAL256

Taipei's original 102-car medium-capacity fleet — selected in 1988, built in 1991, reshaped after two test fires and later converted from Matra fixed-block control to Bombardier Cityflo 650.

C370 (Bombardier Innovia)

The 202-car Bombardier fleet built to extend the Matra railway without a transfer — with a four-country production chain and two conflicting published capacity measures.

C301

Taipei's first high-capacity fleet — 22 six-car trains whose failed first tender, design choices, trans-Pacific delivery and later renewals are recorded by DORTS and TRTC.

C321

Thirty-six Siemens six-car trains procured in three lots — half locally assembled, later modified after a 2003 derailment and now receiving new propulsion equipment.

SINSYUAN [https://commons.wikimedia.org/wiki/File:C321_AT_ZHONGXIAO_XINSHENG_20250906.JPG] • **CC BY-SA 4.0** [https://creativecommons.org/licenses/by-sa/4.0]

C341

Six Siemens trains built for the Tucheng opening — DORTS's first rolling-stock design without a general consultant and the first Taipei fleet to use networked train control.

C371

Taipei Metro's 321-car Kawasaki procurement family — including 162 cars manufactured by Taiwan Rolling Stock through a complete-build-up industrial-cooperation programme.

C381

Twenty-three Kawasaki trains for the Xinyi and Songshan extensions plus one later six-car add-on — with 102 cars produced by Taiwan Rolling Stock.
