

Guides

How payment actually works across the Taipei region — cards, the commuter pass, and fares.

Explainer pages rather than entity records: how the stored-value cards differ, what the regional commuter pass actually covers, and how Taipei Metro's own fare rules work. Each figure is cited to the operator or regulator that publishes it.

See also Taiwan airport ground transport [\[/ticketing/guides/airport-ground-transport/\]](/ticketing/guides/airport-ground-transport/), which keeps the national airport boundary and the different operator layers separate, and payment and ticketing infrastructure [\[/ticketing/guides/payment-infrastructure/\]](/ticketing/guides/payment-infrastructure/), which covers the card technology, on-bus validator hardware and the 2020–2023 merger of the electronic-ticket and electronic-payment regulatory regimes^[1] that the cards themselves sit on top of.

7 entries

Cards, the commuter pass, and how fares work

EasyCard and iPass are separate companies from separate cities that happen to work on each other's networks. The NT\$1,200 regional pass is cheaper and covers more than the pass it replaced. Neither fact is what most English guides say.

How bus fare stages (段) actually work

Taipei and New Taipei buses do not charge one flat fare. They charge by the number of fare "segments" (段) a trip crosses, and where those segment points fall is not published as one complete list anywhere — only two examples are ever officially named.

Fare history and concessions

A dated record of Taipei-region passenger fares, transfer discounts, monthly passes and accessibility-related fare changes, with the gazette gaps left visible.

Taiwan airport ground transport

A source-backed guide to reaching Taiwan's main airports by metro, railway connection, bus, taxi and local transfer, with the national gaps left visible.

Conflict index

Every source disagreement published by this guide, generated from the conflict sections in its content corpus.

Payment and ticketing infrastructure

Card technology, validator hardware and the 2020–2023 merger of Taiwan's electronic-ticket and electronic-payment regulatory regimes into one.

Transport glossary

Plain-English explanations of the Chinese route, fare, ticketing and railway terms used across this guide, with the page where each term matters.

Side by side

	Cards, the commuter pass, and how fares work	How bus fare stages (段) actually wor
Metro base fare	20 NT\$	—
Metro maximum single fare	65 NT\$	—
Metro fare tiers	10	—
Concessionary / child fare	40 % of full fare	—
MRT–bus transfer discount, ordinary card	8 NT\$	8 NT\$
MRT–bus transfer discount, student card	6 NT\$	—

	Cards, the commuter pass, and how fares work	How bus fare stages (段) actually work
MRT–bus transfer discount, welfare card	4 NT\$	—
Transfer time window	60 min	60 min
TPASS card fee	100 NT\$ (refunded on registration)	—
Taipei-registered 敬老/愛心 monthly points	600 points (1pt = NT\$1)	—
Officially named segment-point examples	—	Huazhong Bridge, Taipei Main St
New Taipei published routes, segment range (committed data)	—	1–8
First MRT–bus discount	—	—
Two-way ordinary-card transfer discount	—	—
Circular Line Phase 1 base fare	—	—
Circular Line Phase 1 maximum	—	—
Danhai LRT current fare range	—	—
Ankeng LRT current fare range	—	—
Circular Line current fare range	—	—
