INTERCHANGE

G

Stop 1 of 14^[1] · Xindian District (新店區)^[1] · underground^[6]

POSITION 1 of 14 ^[1]	INTERCHANGE  Songshan–Xindian Line; transfer mode: TBC ^[4]	DISTRICT Xindian District (新店區) ^[1]	STRUCTURE Underground ^[6]
STREET EXITS 5 ^[4]	FACILITIES NTMC publishes a passenger enquiry point with wheelchair availability, accessible ramps and guidance, accessible gates and ticket machines, an accessible toilet and an accessible elevator at every Circular Line station; station-specific nursing-room and bicycle-parking details: TBC. ^[3]	EXIT LOCATIONS Five exits are published in the DORTS station table; the checked HTML route and operator pages do not publish the five street-emergence positions. Exact exit locations: TBC. ^[6]	PLATFORMS AND TRACKS Underground station; platform form, number of platforms and track count: TBC. ^[6]
DEPOT SERVING THIS STRETCH South Depot (南機廠) is the Circular Line Phase 1 main maintenance depot; station-level operating roster allocation: TBC. ^[6]	PUBLIC ART 鄰光 — 艾曼紐·莫侯 (Emmanuelle Moureaux) ; paint, stickers, fibreglass, metal and plastic; December 2019; line-wide work on viaduct columns, drainage pipes, steel beams, sound barriers, platform doors at all 14 stations, selected façades and vertical-circulation walls, and train exteriors and interiors. ^[7]	STATION NAMING TBC	ENGINEERING HISTORY The first-phase route begins at the Dapinglin interchange underground, follows Minquan Road and Zhongzheng Road, then rises toward the  section. DORTS identifies the first main civil-works contract, CF641, as beginning with the Dapinglin continuous-wall and structural works on 5 January 2010. ^[6]

At programme level, DORTS places the first-phase works within 21 civil, water, environmental and electromechanical section contracts, alongside separate systems packages for rolling stock, signalling, power, communications, depot equipment, automatic-fare collection and track; this is a delivery structure, not a station price. [6] The same route record dates the earliest planting contract, IQUX02 for the Y8–Y14 area, to 5 June 2009, and dates the first main civil contract, CF641 for the Dapinglin continuous-wall and structural works, to 5 January 2010. [6] DORTS's construction table calls this station Y06, while the current operating records call it Y07; the builder's engineering identifier is retained here as historical contract context rather than silently converted into the operating code. [6] The DF111 design brief links the Dapinglin section to the Liugong Canal, Shisizhang farmland and the Xindian River crossing, treating those water, agricultural and river landscapes as the local design context. [?] For that section, DORTS describes the "nature" theme through square geometry in façades and seating and through the use of the line colour in interior elements, so the design vocabulary connects the civil corridor to the passenger-facing architecture. [?] The official line-wide art record identifies the public-art procurement as commissioned creation and reports a design fee of NT\$16,000,000; that amount belongs to the corridor-wide commission, not to this station alone. [7] That record describes the commission as extending across roughly 212 elevated columns, about 8 kilometres of beams, about 10 kilometres of sound barriers, platform doors at all 14 stations, selected façades and vertical walls, and train exteriors and interiors. [7] The checked DORTS records therefore establish the station's construction-package setting, landscape brief and share of a line-wide art programme, but they do not publish a Y07-only civil final account or a separate station art budget. [6]
