
Lines

Route overviews, station lists, operating hours and service patterns.

10 PAGES **2** WRITTEN UP **8** SCOPE STATEMENTS

Wenhu Line

FULL PAGE

Taipei's driverless brown line — no cab, a front window you can stand at, and a rubber-tyred guideway that climbs hills the rest of the network cannot.

Sanying Line

FULL PAGE

New Taipei's newest railway — a driverless elevated line to Sanxia and Yingge, open five weeks and still free to ride, written up here while every English source is still a machine translation.

Tamsui–Xinyi Line

SCOPE STATEMENT

The red line — the network's north–south spine, from the riverside at Tamsui through the core to Xiangshan, and the oldest right-of-way on the system.

Songshan–Xindian Line

SCOPE STATEMENT

The green line — Songshan to Xindian through the west of the core, with the network's short branch to Xiaobitan.

Zhonghe–Xinlu Line

SCOPE STATEMENT

The orange line — a Y-shaped route whose two northern arms to Luzhou and Huilong share one southern trunk through Zhonghe.

Bannan Line

SCOPE STATEMENT

The blue line — the east–west trunk through the main station, and the corridor the rest of the network is measured against.

Circular Line

SCOPE STATEMENT

The yellow line — New Taipei's orbital, crossing the radial lines rather than feeding the core, and the network's first driverless steel-wheel operation.

Danhai LRT

SCOPE STATEMENT

New Taipei's first light rail — street-running trams serving the Tamsui new town, with a second phase under construction.

Ankeng LRT

SCOPE STATEMENT

The second New Taipei light rail line — a valley feeder into the Xindian corridor.

Taoyuan Airport MRT

SCOPE STATEMENT

The purple express-and-commuter line from Taipei Main Station to the airport and on into Taoyuan — a different operator, a different fare system, and the network's only express/local pattern.
